We're So Busy Passing Milestones, We Forgot Our Birthday!

CAC was founded over three years ago by leading members of the numismatic community with a mission to develop a higher standard for grading coins. Before CAC, prices for the solid quality coins were tethered to their lesser quality counterparts, thus holding down the market. With CAC, only coins which meet stringent standards for quality within a grade are awarded a CAC sticker. Now, advanced collectors and novices alike have an easy way to identify coins that are solid for the grade.

6 Figs For 4 Berries
Dollars Diminish In Select Grades

Several shows and auctions are on tap in mid to late May, which should provide at least some notion on where we are heading from here in light of the extremely successful CSNS followed by some radical precious metal volatility. May 14 is scheduled for the EAC convention sale, where dealers have already inundated the Pacific Northwest. In addition to the EAC Portland, Oregon show, PCGS will present their members only show at the Las Vegas Venetian, May 18-21. Then, the Goldbergs will host a Pre-Long Beach auction May 29-30 in Los Angeles. We have listed several of the many highlights from this sale herein.

The few minus signs that made their way into the certified Mercury Dime columns this week marked mostly mild reductions in sight-unseen Bids for select FB designated issues. Indications of weakness that resulted in a 6% drop for the NGC graded 1919 FB issues in MS66, however, did not affect the few other decliners in this market segment to the same proportion. This pop 16 coin, with only three graded higher, sold at public auction for less than $750. Only four other examples of this date/grade sold at auction this year, all graded by PCGS, ranging in price from $863 to $2,530. Lower-graded and nominal quality Mercs all stayed cool, calm, and collected. Late-date Walkers in MS64 thru MS67 continue to be hot and in serious demand. In fact, there were some rather impressive increases in Bid, especially in the MS67 category. These include the PCGS graded 1945-S (pop 6), 1946-S (pop 25), and the 1947-D (pop 8), their Bids up by 20%, 17%, and 10%, respectively. Most significantly, however, is the rather large number of increases that are ongoing. With a *CCDN* Coin Market Index of 953, Walkers are next in line to return to the 1,000 point baseline, established January, 1990.

Morgan Dollars, Buffalo Nickels and Proof Gold Type have already surpassed this watermark at 1,215, 1,073, and 1,008. Amidst the relative calm within Silver Commems, a few issues are eliciting steady sight-unseen Bidding action virtually across their entire Mint-State grading spectrum. The Texas Centennial Type, Stone Mountain, and Wisconsin issues are among those sought after. Gold Commems took a break from last week's volatility as some of their recently downward adjusted Bids may stir up more excitement for them soon again.

Generic Morgan Dollars are experiencing a minor pullback, affecting only select common dates at the MS63 tier, and a somewhat more encompassing group of the MS65 listings, with the latter now pegged at $185. Sentiment remains bullish on the in-between grade of MS64, where dealers increased Bid to a minimum $96 for any date. Prooflike and DMPL Dollars are receiving some strong attention as well, with over 200 increases having been recorded. Glancing at the charts brings to mind why the Morgan Dollar series presents so nicely to the novice collector; an iconic coin where over half the series is available at or near common prices up to and including Gem pieces. Generic Peace Dollars have reversed their course in MS63-MS64, dropping by as much as 9%.

We see big time moves for PCGS certified Draped Bust Dimes, Small Eagle in grades MS63-MS67, sight-unseen Bid for MS63 examples skyrocketing 60% to $20,000. Draped Bust Heraldic Eagle Dimes rev it up in MS67 tacking on a 33% increase to reach $100,000. Will this higher six-figure sight-unseen Bid jar loose one of the three certified? All three happen to be the 1805 4 Berries variety. Sight-unseen Bids are also higher for Capped Bust Quarters, reduced size, and Liberty Seated Quarters, No Drapery in MS62. This is the third round of Bid increases for these slabs this year. Mint State Gold Type is relatively solid at present levels for material that is regarded as numismatic, save NGC holdered $5 Indians in MS65 where they are now being offered at a discount. Bid is now at $10,000 for this pop 561 example, which is down quite a bit from the July 2006 Bid of $15,400.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

LET CDN DO ALL THE WORK!

Need to contact America's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list of approximately 5,000+ current names and addresses. And **current** is a promise taken seriously - the data base is updated **daily**. All for only $325 - well below the mailing industry standard of $75/thousand.

To make this offer even more attractive, labels are available in both First Class order or Presorted for Basic Bulk Rate mailings (you can save more than $900 over First Class postage rates!). Need just one state or region? Need a trial sample? Contact us for details!

2011 NUMISMATIC DEALER DIRECTORY

YES, I want to order mailing labels averaging 5,000+ names from the 2011 Numismatic Dealer Directory. I understand that my $325 fee entitles me to only one usage of these names. _____signature

My check for $325 payable to CDN, is enclosed.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Greatest Gold Mine of Coin Data - Yours FREE!

CAC's POP Report puts all the data you need at your fingertips

CAC-stickered coins give you confidence. That's because we verify previously graded coins and award our green sticker only to those that are at minimum "solid" within their grade. Data for each of the stickered-coins is maintained in an elaborate online database, where you can easily verify any CAC coin.

Now, all of the data is compiled in CAC's Population Report – an absolute "must have" if you are active in today's rare coin market. Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's an easy way to access a gold mine of CAC coin data, the FREE CAC POP report.

Dollars Dip Deeper Walkers Maintain Strong Stance

Common date Morgan and Peace Dollars have done an about face from their recent run-up. Declines are substantial and widespread affecting grades MS63-MS67, and are lower by as much as 24%. Peace Dollar drops are not nearly as dramatic, but are encompassing all the generics in MS63-MS66. Take note that market-makers have all but disappeared from the higher sight-unseen levels, and this material will continue to drop as sellers decrease their asking prices. One bright spot is found for Morgan Dollars certified by NGC by way of higher Bids. Activity is focused on San Francisco and Carson City products, where in the case of the former, the slightly better to rarer dates from the mid to late 1880s are sought at higher Bids, while in the case of the latter, interest adheres to the more readily available CC issues, specifically 1881 to 1884. One of the higher dollar items moving upward is the 1883-S in MS65, which was pushed up to a Bid of $10K. Last time this population 9 coin sold at public auction was in November 2009 when it realized $19,550. The 1884-S, a better date than the '83-S in MS65, receives new and higher sight-unseen Bids for coins slabbed MS61 thru MS63. In all three grades targeted, recent auction results substantially exceed the new levels. This popular date wields NGC populations of 151, 108, and 42 respectively. Another bright spot for Dollars is that market-makers are still paying strong money for blast white or whitish coins.

Mercury Dimes continue to be quiet overall, however sight-unseen buyers do exist even though money is being left on the table at retail public auctions. A pair of late date NGC MS67FBs sold for as much as 23% below sight-unseen Bid. Plus signs still embellish the Bid columns for Walkers, though not as prolifically as these past few weeks. Some cooling down is to be expected among the lower-graded, later-date and common issues due to the psychological confidence buster from a declining Silver Spot. Impressively higher Bids appear for some pre-war issued favorites such as the 1935 in MS67 which is up astoundingly by 30% this week to a Bid of $1,700. This coin, with an NGC pop of 22, rose along with another highly sought after issue, the 1937, a pop 76 in NGC MS67, which gained 25% while its PCGS counterpart also advanced by over 10%. Such advances make clear that quality consciousness is prevailing among very aggressive Bidders for these classic coins.

One Silver Commemorative eliciting significant sight-unseen interest is the Texas Centennial, which has plenty of visible buyers available at current Bid for both services and all Mint State grades. NGC Delawares in MS66 advanced this week by 11%, while Iowas in MS66 and MS67 increased to $100 and $150, respectively. Good sustenance is indicated for this segment as not a single minus sign is posted. Aside from a moderate dip in Bid for the PCGS MS62 1903 Jefferson $1, the Gold issues held up well during this week's slide in Gold Spot and despite forecasts of generally disappointing economic activity.

Mint State Type Bidding activity is limited to Nickel designs, as 1883 No Cents Liberty Nickel in MS67, and Three Cent Nickels certified MS62 thru MS64, in all cases enjoy Bid increases. Superb Gem No Cents Liberty Nickels are now at $1,250. More importantly is that this long neglected Type receive some positive attention. PCGS slabs of this issue have been on a downward journey in recent years, still holding above $2,000 in January 2009, and declining steadily to $1,175 where it resided for some time until today. NGC certified Superb Gems hit bottom in April 2010, digging down to $975, have since recovered to $1,000. Most generics that live on the Mint State Gold chart, if they posted a decline in Bid this week, did so rather tamely as the majority of decliners are off anywhere from less than 1% to around 4%.

The EAC sale, held May 14 in Portland Oregon, hammered home $290K. A few highlights from this Copper auction include the following: a PCGS AU58BN Proof 1841 ½ Cent realizing $3,300; a PCGS AU53BN 1798 Large Cent 2nd Hair Style hammering home $4,675; an 1802 Large Cent, Normal Reverse, graded PCGS AU58BN selling for $4,840; and an 1850 Large Cent graded by NGC as MS63BN bringing in $1,210.

GreatCollections.com will auction a PCGS graded 1842-O Eagle, which is the only Mint State example with the CAC imprimatur. This brings to mind the $4 million sale of David Hall's Registry Set of $10 Libs, which included a PCGS AU58 example of the 1842-O. As the June 2-4 Long Beach Expo gets closer, we've included several of the many highlights from the Heritage sale herein.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

CERTIFIED COIN DEALER newsletter

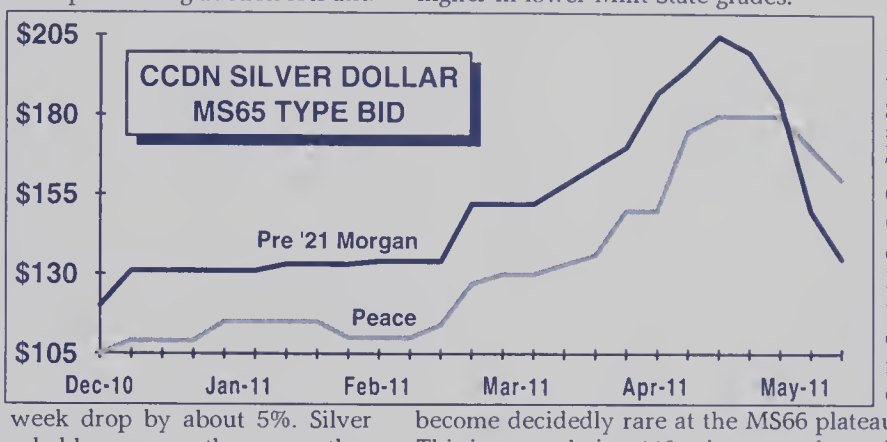
Sight-Unseen Market Active
All Eyes Focused On Auctions & Expo

Dealers are arriving on the left coast for the first of many rapid fire tests of the rare coin market. Shows and auctions will dominate June, and with the extraordinary success of the CSNS show in the review mirror, some market participants are concerned of ending up crestfallen. Still, there is plenty to be optimistic about as metals have made a bit of a comeback with Gold at $1,523, Silver over $37, and Platinum at $1,778. Many dealers are already in Long Beach and the Beverly Hills area previewing auction lots and trading privately in mini hotel bourses preparing for the big Long Beach Expo to begin on June 2.

The sight-unseen marketplace is extremely active, an uncommon occurrence leading into a major show and multiple auctions. Walking Liberty Halves are now the centerpiece of the generic coin market, and have virtually taken over the spotlight from Morgan and Peace Dollars. Every week since the beginning of April, Walkers have moved up, and this week is no different, though higher Bids are concentrated on NGC material this time around. Only a handful of issues are falling through the cracks, selling for less at public auction, as can be seen in this week's Market columns. Within Mercury Dimes, NGC graded 1936-D in MS65FB and PCGS 1945-D in MS66FB saw their Bids of last week drop by about 5%. Silver Commems collectors are yearning for new material, probably more so than any other segment, but current Bids simply have not been able to coax enough new and interesting examples out onto the bourse and auction venues. One lucky buyer was able to purchase an NGC MS65 Hawaiian in an on-line auction for $3,565 while visible, sight-unseen buyers stood by waiting to pay $4,000. The consignor in this example left some one thousand dollars on the table. A single decline in Gold Commems has occurred for the Grant Dollar without Star in NGC MS67, now Bid $100 lower.

Peace Dollars are reasonably strong in light of the recent sell-off in generics that hit both this series and Morgan Dollars following the downturn in the price of Silver Spot that began during the first week of May. Numerous advances in Bids by as high as 5% over last week are in place, including some targeting generics in MS63 once again. And while there are instances of common dates selling at a discount, Bidding support has emerged to keep Gems afloat at $160 — A somewhat astonishing situation when one considers that MS65 Peace Dollars were Bid at $105 in early December while Gem Morgans were $120. Peace Dollars graded Superb by NGC are now at $2,400, while PCGS specimens continue to have buyers willing to pay $3,000 for any old example. These have a combined pop of 488 with only 4 graded higher. Common MS65 Morgans have declined, bringing Bid back down to $135 after a recent peak of $205 last month. Good news on the Morgan front involves a trio of Carson City issues, which are moving higher in lower Mint State grades.



Mint State Type is rather quiet this week throughout the Copper and Nickel portions of the chart. Silver is a different story as Liberty Seated Dollars come in for another round of increases in MS61 and MS62 along with PCGS Trade Dollars in the latter grade. Mint State Gold Type is mixed, but remains buoyed by Gold Spot which has remained over $1,500 an ounce for the past week. Common date Double Eagles have adjusted downward, though only trivially, as a few coins were sold at the discount window. $10 Libertys with Motto, not a particularly scarce design Type to acquire in the lower reaches of Mint State, become decidedly rare at the MS66 plateau where Bid is advancing for NGC examples. This is a population 448 coin across the entire Type. The 1901-S accounts for 259, or 58% percent of the total made by NGC. Next in line is the 1901 where NGC has recorded making 60 coins at the MS66 grade level. PCGS has made 253 of the Type and sight-unseen Bid is $5,175, while NGC slabs are now commanding $5,750. Proof Gold Type as a segment is responsible for 4 of the top 10 prices achieved at public auction this year. Support via sight-unseen Bids is strong from PR65 thru PR67. Dealers persist in their support for Proof Type listed in the Copper and Nickel segments, awaiting the next round of major auctions, which are set to begin this Sunday, May 29 in Los Angeles. Proof Silver Type is similarly poised and adds one positive development. PCGS PR64 Liberty Seated Dollars, No Motto are targeted by at least one dealer, upping the ante by 62% for this popular Civil War issue. Auction records indicate the sale of only 36 PCGS PR64 examples in the past two years, 13 of which sold for less than the new, sight-unseen Bid of $6,000. The last two to sell at auction were on April 27, one an 1864 going for $6,900, and the other an 1873 with a CAC sticker, hammering home $7,475.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through caretul study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" - Lowest asking price during the previous three weeks (*w*eek old); "**m**" - Lowest asking price during the previous three weeks (*m*onth old); "**t**" - *T*rade during the most recent month; "**lm**" - Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" - auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

CAC has evaluated over 200,000 coins with a market value over $1.1 billion. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are only placed on quality coins.

What's more, CAC is a powerful market maker for it's stickered coins. In fact, CAC has recently purchased over $175,000,000 worth of coins.

So the CAC sticker does not add value - It is just an easy way to identify coins that are solid for the grade. And it gives you confidence in the value of a coin.

The CAC sticker doesn't add value, it just helps to identify a quality coin.

CERTIFIED COIN DEALER newsletter

*CCDN — a weekly report on the **Sight-Unseen** certified market published by the Coin Dealer Newsletter (est. 1963)*

Vol. XXVI No. 22 | June 3, 2011 | Single copy price $4.00

Over $8 Million In APRs Thus Far
1794 Flowing Hair Dollar Gaveled $575,000

With the Dollar craze cooling off a bit and the Long Beach Expo underway, the sight-unseen marketplace is expectedly slower, especially when compared to last month. However, significant trades are definitely taking place as a 1911 Strong D $2½ Indian graded MS65 by NGC changed hands sight-unseen for $42,500. In addition, no less than ten Proof 1995-W Silver Eagles sold blindly through the CCE dealer-to-dealer trading network. These coins are notorious for developing milk spots, making the $2,800 paid for each of the PCGS PR69 DCams that much more impressive considering the no return policy of the sight-unseen marketplace.

It will be interesting to see if Walking Liberty Half Dollars still remain on the want lists of the major market-movers who will be convening at this week's Long Beach Expo, considering the recent and significant Bid increases. The voracious appetite for Walkers is now being reflected by the multiple plus signs appearing mostly within the MS64 and MS65 columns for specimens graded by ICG and, to a lesser extent, by ANACS. A key-date issue, the PCGS graded 1921-S in MS65, advanced in sight-unseen Bid by an astounding $20,000 to $75K constituting a 36% rise for this pop 16 coin with only one graded higher. The last time this coin sold at retail public auction was in May of 2009 when it realized $63,250.

Even though the Mercury Dime segment still appears unable to create any kind of drama for us, the show must go on. This series has been dormant so long that the soon to be released Palladium bullion coin with the same design may spark new interest here. Virtually all PCGS and NGC graded Silver and Gold Commemoratives remain stable, and there is hope among Commem collectors that some newly certified material will appear at this week's Long Beach and mid-June's Baltimore Expos, at least enough so to restore the somewhat long-lost excitement that once prevailed throughout this segment. This quintessential category of the sight-unseen market will be attentively watched and regarded almost as a gauge of overall market conditions, as revealed by the bourse floor trading and auction results at these events. York County grading MS63-MS65 are needed by at least one dealer who will even accept ANACS and ICG sight-unseen, just ship.

Generic Morgan Dollars absorb a handful of Bid declines, though not nearly as severe in magnitude nor in the number of issues affected this week when compared to last week. Common date Peace Dollars have also declined in the lower Mint State grades through Very Choice. Gems hang in there with sight-unseen Bid at $160, 19% above the MS65 Morgan Bid of $135, also unchanged. CC Dollars in their original government cases with box and certificate are targeted by dealers at new higher levels. Conversely, those with an NGC tamper evident wrap-around grade sticker are declining in MS64-MS65. Selective, directed Bidding continues to characterize the Mint State Type segment, with Capped Bust Halves edging higher in NGC MS62, and a close cousin, the Reeded Edge Type Bust Half Dollars likewise moving higher, this listing targeted in the lofty grade of MS64. Mint State Gold Type remains soft even in light of near record level Gold Spot at $1,542 an ounce. Bid changes range from miniscule to significant, the latter represented by Gem examples of the Type I Gold $1 slabbed by PCGS, which falter to $3,900. To put Mint State Gold Type in perspective, there are 76 issues that are lower versus 53 that are higher from five years ago in grades MS62 thru MS65 when Gold Spot was roughly $650 per ounce.

Ira and Larry Goldberg sold a 1794 Flowing Hair Dollar graded PCGS AU58 CAC, the gorgeously toned example sold for $575,000, the third-highest price realized at auction this year. The Goldbergs' pre-Long Beach sale realized around $7 million, and we have included a short list of some of the many highlights from the sale herein. Bonhams & Butterfields added their own total of nearly $1 million from their auction May 29. Heritage, the official auctioneer of the Expo has yet to begin their sale.

We're So Busy Passing Milestones, We Forgot Our Birthday!

CAC was founded over three years ago by leading members of the numismatic community with a mission to develop a higher standard for grading coins. Before CAC, prices for the solid quality coins were tethered to their lesser quality counterparts, thus holding down the market. With CAC, only coins which meet stringent standards for quality within a grade are awarded a CAC sticker. Now, advanced collectors and novices alike have an easy way to identify coins that are solid for the grade.

Sight-Unseen Market Strengthens Don't Call It A Comeback: Dollars Up Again

With Long Beach and its very successful associated auctions totaling over $20 million in the books, dealers and collectors are fully preparing for next week's Baltimore Expo. Stack's Bowers will host the official and quite large auction, with several highlights included herein. The Fifth Annual FUN show is right on the heels of this shindig, being held July 7-9 at the Orange County Convention Center in Orlando, FL. Heritage will perform the auction duties July 7-10. Next, after a bit of time to absorb the preceding action, summer holds in store the ANA World's Fair of Money from August 16-20 in Chi Town. Indeed, the next few months promise to be quite busy for the rare coin caravan, which has started off with a real bang in Southern California.

Mercury Dime enthusiasts were noticeably present at past week's Long Beach Expo but refrained from engaging in any ground-breaking trading. The sight-unseen market is equally slow. In fact, only a single example (a PCGS MS67FB) has traded sight-unseen over the electronic trading networks since January. The retail public auction scene tells a different story, as the vast majority of available date and mintmarks under five figures in PCGS MS67FB sold for well above sight-unseen money in last week's auctions. A $270 decrease in Bid for the much sought-after 1916 Walker graded NGC MS67, with a pop of 8 and only 1 finer, may perplex the many quality conscious, first-year-of issue collectors. This is what can happen when a dealer needs to quickly turn over highly desirable material so as to assure adequate funding in time for the next big upcoming event. At the end of this series, both the 1947 and 1947-D, also in NGC MS67, registered weakness, the former's Bid declining by 17%, back to $830 again, where it was in mid April. For the segment as a whole, most sight-unseen Walker Bids held steady, especially the common dates which still have plentiful buyers after their recent run-up. Despite their popularity, Bids for PR64 graded Walkers, particularly the PCGS graded 1936 and, especially, the NGC 1938 issue, fell this week to $2,275 and $475, respectively.

Most Bids that trickled lower for both PCGS and NGC certified Commemoratives, did so moderately, but the much higher number of minus signs appearing this week could lead to a perception that this segment of the sight-unseen market is approaching another down cycle. A 22% drop in Bid for the NGC graded 1934-D Oregon in MS67, a pop 19 coin with none finer, for example, is a favorite among collectors and set registry builders, and may be discounted from time-to-time. But the sustenance of many of the issues within this segment during these past weeks must not be overlooked. The significantly higher Bids posted for PCGS graded 1947 and 1950 Booker T. Washington PDS Sets in MS67, up by as much as 15%, attest to the strength this market is capable of generating. Gold issues remain in demand for the most part, despite some downward movement mostly affecting the $1 denominated issues. The biggest hit was the Lewis & Clark in NGC MS64, dropping $600 to $2,500 Bid after a poor auction outing.

Common date Morgans perk up in Choice and Very Choice, advancing 4% and 5% respectively. Generic Morgans in Gem show even more luster in the sight-unseen market, reigning in a 15% increase from last week. However, a number of issues are dropping in various grades by as much as 30% as a result of weak auction prices realized. For example, MS66 NGC slabbed Morgans retreat by 6% for select dates to a Bid of $315. Prooflike and DMPL Morgan Dollars have jumped higher with dealers now paying $80 sight-unseen for any date grading MS63. Peace Dollars are also perky with increases recorded for commoners in MS63 and MS64. Peace Dollars in Gem are down to $475 Bid after a number sold at retail auction for $454, leaving 5% on the table.

One prized PCGS 1918/7-D Buffalo flaunting the MS64+ grade, hammered in an astonishing $161K at the Long Beach Expo auction. Compare this to its last outing when an MS64 CAC realized $77,625 in August of 2009 or to the PCGS Gem which brought in $265K in January of 2010. Only a single decline was recorded in the MS67 column, as an NGC example dated 1919 dropped by 7%. A PCGS 1920-S in Gem wrangled in a princely sum of $17,250 at the Expo auction, realizing 21% less than its last auction outing in May 2009 when it realized $21,850.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

Greatest Gold Mine of Coin Data - Yours FREE!

CAC's POP Report puts all the data you need at your fingertips

CAC-stickered coins give you confidence. That's because we verify previously graded coins and award our green sticker only to those that are at minimum "solid" within their grade. Data for each of the stickered-coins is maintained in an elaborate online database, where you can easily verify any CAC coin.

Now, all of the data is compiled in CAC's Population Report – an absolute "must have" if you are active in today's rare coin market. Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's an easy way to access a gold mine of CAC coin data, the FREE CAC POP report.

NGC EARLY RELEASES

The designation you can trust — now available for all modern coins.

To qualify for this designation, early-issue coins must be in our hands within the first 30 days of release, making NGC Early Releases the strictest designation of its kind.

Stay tuned for eligibility requirements and cut-off dates. NGCcoin.com/earlyreleases

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Stack's Bowers $1.8 Million And Counting Generic Gold Type Soft

Many dealers and collectors are currently attending the Baltimore Expo. While the first couple sessions have completed from the Stack's Bowers auction, there is quite a bit more to come. Dealers have reported that the conditions were extremely competitive during these early sessions, with healthy prices realized thus far. Session one brought in over $1.8 million, a strong beginning. A few of the many esoteric highlights from this session include a couple 1776 Continental Pewter Dollars, both graded MS63. The first realized $115K, and was a CURRENCY example slabbed by PCGS with a CAC sticker. Following was a CURENCY example graded by NGC and realized $120,750. In addition, an 1883 Hawaiian Quarter graded PR65 Cameo by PCGS, donning the CAC green bean, pulled in $25,875. A list of additional, traditional highlights from the first session are included herein.

Mercury Dime collectors aren't yet coming out of the woodwork by the droves, but there is a consistent steadiness to this segment of the sight-unseen market, unlike many of the other 20th century series reported here. Nonetheless, a popular favorite, the 1936-D in PCGS MS65FB, dropped 24% to a Bid of an even $100 after a poor internet auction outing. This pop 319 coin with an almost equal number of specimens graded finer and Bidding for more than double in MS66FB, is not the most difficult to find. Perhaps they deserve a good rest now, but not one single Walker in any Mint State grade inside a PCGS or an NGC holder stirred up any extraordinary excitement this week. The lack of pluses and, more importantly, the lack of minus signs throughout the columns, confirms that this segment remains on solid ground, and there are plenty of supporting Bids across-the-board for many issues, including nearly all commoners.

Sight-Unseen Bidding for certified Silver Commems appears somewhat lackluster, as Marylands grading NGC MS65 experienced some discounting, resulting in a 10% lower Bid. Reductions occurring among a few high-grade Gold Commems include the NGC MS67 $2½ Pan-Pac, and the PCGS MS65 $2½ Sesquicentennial being the most noteworthy of these declines. Those commonly seen but popular Proof Franklin Halves, extracted from their original Flat-Packs, and certified as PR61 adjusted downward by 7%. Dealers continue to anxiously offer current sight-unseen Bid, mostly for PR64 thru PR67 graded Mercury and Roosevelt Dimes, as well as for pre-war issued Proof Walkers. Better date Morgan Dollars are continuing to show stamina, especially in the lower Mint State grades as collectors are all-too-well aware of their scarcity and potential. While there may be some apparent volatility affecting the sight-unseen Morgan and Peace Dollar markets, Bids for many common and better date issues, generally, are still well above levels from only a few months ago. Several common date Peace Dollars have been trading sight-unseen and are off a bit in MS65, though visible buyers are still looking for quantities at these slightly lower levels. GSA Dollars with original box and certificate remain extremely popular with collectors, and the key to this series, the 1879-CC with the NGC wrap-around sticker graded MS64 realized $10,063 at the Stack's Bowers auction. Another GSA slab, an 1891-CC "Spitting Eagle" graded NCG MS63 CAC grabbed $4,025 at this sale.

Lower Mint State graded Gold Type is holding steady and even attracting higher Bids, while generic Gold issues in higher grades are having a bit of a challenge finding Bidders willing to cough up sight-unseen Bid money—one exception being the dealer still willing to pay $1,725 for any $2½ Liberty graded MS66 by NGC, even though they have just sold at retail auction for only $1,500. Premiums for common date Libs and Indians of the various denominations, as well as for $20 Saints, remain historically low, and this material is being touted as a current bargain.

It is impossible to ever declare the Type segment as totally inactive since it encompasses so many different denominations and varieties that are almost constantly sought by dealers and collectors alike. Aside from PCGS graded PR64 Barber Quarters, which fell by 5%, Bids for all other *CCDN* issues remain in place. Overall, this past week's sight-unseen Bidding activities within both the Unc and Proof segments make the Type area as a whole appear unusually calm as the pool of potential Bidders are just refraining from making any commitments while away at the big Baltimore show and other events that are due to take place in Orlando and Chicago this summer.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity including the highest nationally reported sight-unseen Bids, Asks Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

CAC has evaluated over 200,000 coins with a market value over $1.1 billion. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are only placed on quality coins.

What's more, CAC is a powerful market maker for it's stickered coins. In fact, CAC has recently purchased over $175,000,000 worth of coins.

So the CAC sticker does not add value - It is just an easy way to identify coins that are solid for the grade. And it gives you confidence in the value of a coin.

The CAC sticker doesn't add value, it just helps to identify a quality coin.

CERTIFIED COIN DEALER newsletter

*CCDN — a weekly report on the **Sight-Unseen** certified market published by the Coin Dealer Newsletter (est. 1963)*

Vol. XXVI No. 25 | June 24, 2011 | Single copy price $4.00

Generic Walkers On Fire
Sight-Unseen Trading Active

Stack's Bowers managed to add $12 million to their total since our last report on the first session, bringing the Baltimore auction's final price realized to $13.8 million. This newly combined auction firm is already on to their next sale, an online-only event that will conclude July 7. Dealers are now preparing for the upcoming FUN show, July 7-9. Heritage will hold the sale running from July 7-10 in Orlando as the official auction house of the Summer FUN gala.

Despite the vibrancy of the major auction activity in Baltimore, the Mercury Dime segment drew less attention than expected. However, several late-date issues in MS65FB and MS66FB are demonstrating some rebounding strength, particularly the 1943-D and 1945-D. Many of these high-grade Denver issues, while quite prevalent at shows, can be enticing and affordable acquisitions for beginner collectors, especially when they can be purchased for well below current sight-unseen Bid. This can be seen in this week's MS67FB Market column where NGC examples of the '41-D, '43-D, and '44-D sold at retail auction for as little as $84, while sight-unseen buyers are offering to pay $107.

Walkers, especially late date Mint State issues, appear to be "on fire" once again as the recent auction activity no doubt lent positive momentum to this segment. While Bid for the PCGS graded 1933-S in MS66 retracted a bit, most short-set issues in MS63 thru MS66 performed with enough positive energy that would please any holder of certified Walker material. A glance at the chart herein reveals that common dates have outperformed the 20-piece short-set since January. Only a small number of collectors can own such sets, especially in MS66 condition where only 330 are possible to complete. This is the population for 1942-S, representing the fewest number encapsulated by PCGS within the set at this grade level.

The results of the sight-unseen Bidding activity for Silver Commems are mixed, with minuses far outweighing pluses once again. Although the Gettysburg in MS65 posted a healthy 11% advance, and some early date Oregon issues appear back in favor at current levels, the general activity can be best described as being spotty and somewhat anemic. Poor conditions here are most reflected by a rather drastic decline in Bid for the NGC graded 1921 Pilgrim in MS67 after a recent auction outing. This negativity prevailed within the Gold Commem category as well, particularly among the $1 denominated issues. The $775 drop in Bid for PCGS MS65 1905 Lewis and Clarks was among the most significant of the declines. This is another area where material is selling at retail public auction for well below sight-unseen Bid. Several examples of money being left on the table can be seen in the Market columns this week.

Generic Walkers	1-7-11 PCGS Bid	6-24-11 PCGS Bid	% Change
MS63	$30	$33	+ 10%
MS64	$45	$53	+ 18%
MS65	$88	$120	+ 36%

Walker Short-Set	Max Sets Possible	1-7-11 PCGS Bid	6-24-11 PCGS Bid	% Change
MS63	501	$792	$833	+ 5%
MS64	1,748	$1,122	$1,250	+ 11%
MS65	2,084	$2,739	$3,135	+ 14%
MS66	330	$5,899	$5,905	0%

Both the Mint State and Proof Type segments were well represented with material during the Stack's-Bowers Baltimore auctions this past week as some astoundingly beautiful specimens of various denominations and varieties were passed on to their new, proud owners. Prices realized for much of the material that fell under the hammer were strong. But, paradoxically, the overall market activity concluded this week with some negative results too. A rarity such as the Small Eagle variety of the Draped Bust Half Dime in NGC MS65, with its previous week's Bid at $60,000, fell tumultuously by as much as $18,000. Proof Type has remained very much stable during these recent periods of overall market volatility.

Gold has been on a bit of a wild ride lately. The yellow metal approached its all-time high this week, with some help from the Fed keeping interest rates at current levels. The President announced his decision to release 30 million barrels of oil from US reserves into the marketplace, causing Crude to fall. Gold Spot followed suit, and dropped from $1,553 Wednesday to $1,520 Thursday, the largest one-day decline in roughly two months. Generic and better Gold Type issues are following in a correlative, downward path for the most part. It is important to bear in mind that numismatic US Gold almost never rises in a completely linear manner during Gold bull markets and has always been a long-term hedge against monetary uncertainty, the kind that we so often hear is now prevailing. Aside from the slight increases for generic Double Eagles, the remainder is experiencing widespread weakness across-the-board. NGC graded $2½ Libs MS65-MS66 are still selling at auction for far less than what at least one dealer is offering, sight-unseen. Take a look at the Market column for confirmation. Go figure. Dated and Proof Gold are experiencing good, solid demand at current Bid levels.

Morgan and Peace Dollars have taken a turn lower, primarily with common dates being affected in grades MS63 thru MS67. Additionally, quite a few slightly better dates are also being jettisoned. These slightly better dates are lower in direct response from their auction prices realized, which were extremely disappointing. But, better-date and most higher graded Dollars of both varieties are largely unaffected by the negativity marked from minus signs posted alongside virtually every common date issue. This resilience is more important to note than the almost complete absence of plus signs posted for this segment this week.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the week prior to publication (week old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – *T*rade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

CAC has evaluated over 200,000 coins with a market value over $1.1 billion. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are only placed on quality coins.

What's more, CAC is a powerful market maker for it's stickered coins. In fact, CAC has recently purchased over $175,000,000 worth of coins.

So the CAC sticker does not add value - It is just an easy way to identify coins that are solid for the grade. And it gives you confidence in the value of a coin.

The CAC sticker doesn't add value, it just helps to identify a quality coin.

Walkers Continue To Climb
Slow Summer Looks For FUN

The summer slowdown is still in effect, with dealers and collectors taking a breather from coins while going on vacations, preparing for Independence Day celebrations, and so on. Action will pick up soon though, as the Summer FUN show is set to run July 7-9 in Orlando, Florida. Heritage will serve as the official auction house for this show, with several anchors for the July 7-10 sale, including the following collections: Little Rock, Part II; Jeepy-Louise; Emil Ross; and MJT.

Many of the late-date and high grade Mercury Dimes with Fully Split Bands that appear in on-line auctions are being quickly scooped up by collectors at bargain levels. Wholesale buyers have visible sight-unseen Bids that are much higher than the levels for which these coins are selling. Over a dozen NGC examples grading MS65FB-MS67FB sold this week alone for as much as 20% below standing offers, once again leaving money on the table rather than in the consignor's pocket. A PCGS MS63FB 1916-D comes up for the offering during the Summer FUN show Heritage auction next week, an event that should create much excitement. The last one to sell in this grade was in late January and realized $14,375 at a Goldberg auction.

Next week's Heritage auction in Orlando is featuring a splendid selection of Silver Commemoratives, and may re-ignite some positive and stimulating activity in this segment. Other than a slight upward move in Bid for Elgins grading NGC MS65, a bit of a rebound occurred for PCGS MS63 1904 Lewis & Clark Gold Dollars, which reduced their rather steep decline from last week. Both Silver and Gold Commem series remained fairly unscathed this week and poised for the anticipated competitive Bidding activity due to occur in Florida.

Walkers continue to be red hot, with advances outnumbering declines for fifteen of the last twenty weeks. The numerous plus signs appearing again within the MS63 thru MS65 grade columns for later-date Walkers attest to an unshakable confidence many sight-unseen Bidders have for material within this segment despite what appears to be almost deflationary conditions afflicting other coin series. As a result, Walkers appear as detached from other coin market segments as never before, as if acquiring an almost "Blue Chip" appeal. This appeal should only strengthen, among both advanced collectors and novices alike, as the U.S. Mint this week releases the 2011 Proof American Silver Eagle featuring the Walking Liberty design, marking the 25th anniversary of this modern issue.

Sight-unseen trading among cartwheels has been far from dull, but many of the common date Morgan and Peace Dollars that posted declines last week continued in their descent to lower levels. The value of dipping remains high here as market-makers are currently paying quite a premium for untoned specimens. For example, sight-unseen Bids for white Morgans versus toned in grades MS64-MS66 are $67 vs. $60; $150 vs. $130; and $360 vs. $250. Both PCGS DMPL and NGC DPL Bid columns remain free and clear of any minus signs as sellers refrain from letting them go at a discount. Collectors appear to be demanding material of utmost quality for their money within this segment. In fact, some highly aggressive Bidding can occur to acquire a truly rare item, as is the case this week for 1889-O Morgans in MS65 with those thoroughly deep mirrors on both sides. Bid nearly doubled to $15,000 for this combined pop 3 coin with only 1 graded finer. The last time a PCGS coin sold was in June of 2010 for $48,875 and has since upgraded. The last auction record of an NGC example selling was in October of 2009 for $9,775.

Mint State Gold Type is mixed with both advances and declines, though remains soft overall. The majority of better material here continues to have visible buyers at or near current levels. Ten Dollar Libs and Indians remain popular with collectors as sight-unseen Bid for the latter moves up to a cool grand in MS63. Despite the disappointing weakness that has been ongoing for most Gold Type issues, especially generics, much of this material has been, and continues to be, regarded as relatively affordable hedges against the monetary uncertainty conjured up by such things as noticeably higher commodities and consumer goods prices, the U.S. Dollar's downward trending foreign exchange rate, and domestic political debate over national debt reduction. Neither downward nor upward motion of any significance for any Copper, Nickel or Silver Type coins can be reported other than the fact that this segment is almost sure to see increased activity on the bourse and at auction next week in Orlando.

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

CAC has evaluated over 200,000 coins with a market value over $1.1 billion. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are only placed on quality coins.

What's more, CAC is a powerful market maker for it's stickered coins. In fact, CAC has recently purchased over $175,000,000 worth of coins.

So the CAC sticker does not add value - It is just an easy way to identify coins that are solid for the grade. And it gives you confidence in the value of a coin.

The CAC sticker doesn't add value, it just helps to identify a quality coin.

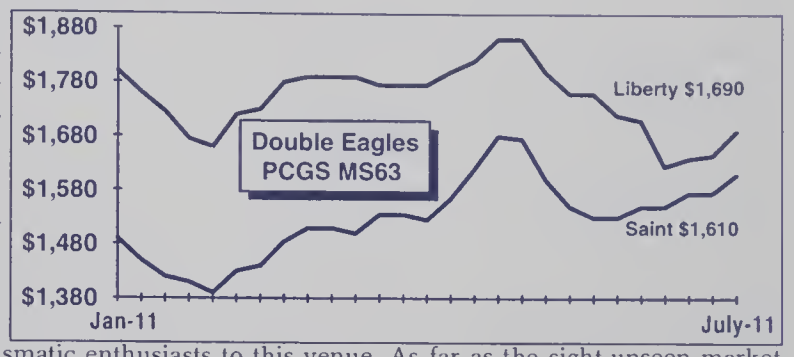
Winged Liberty Dimes Take Flight Gold Type Gains Ground

Dealers are gathered in Orlando, Florida at the 5th Annual Summer FUN show with official auction by Heritage. One can't help but wonder if Gold's see-saw activity has had an effect on the show's activity. In just the last week of trading, Gold has seen levels as low as $1,482 to as high as $1,530 per ounce. Silver has made a bit of a comeback as well as Spot has moved from a low over the last week of $33.58 to a level of $36.53. Such comebacks, however small, still bode well for the rare coin market in general, and the Florida show in particular.

It sure has been a while since so many plus signs have adorned both the PCGS and NGC Mercury Dime columns as they have this week. In fact, one would have to go back over a year to see such positive increases, and even then, only 95 issues went up compared to the 184 today. While early issues remained quiet for the most part, the clamor among sight-unseen Bidders for later-date MS64 thru MS66FB issues is quite apparent as the seemingly small gains in dollar terms make for some rather impressive Bid increases on a percentage basis. The *CCDN Coin Market Index* for Mercury Dimes has finally increased 6½ points to 750.35 after being virtually stagnant for more than a decade. This positive action may be attributed, at least in part, to the US Mint's upcoming release of the one ounce Palladium Eagle featuring the proposed Mercury head motif obverse design. Currently, Palladium is at $787 an ounce after peaking for the year at $858 in February 2011.

Even though the Silver Commem market appears lackluster again, this segment avoided any significant downturns this week. Sufficient support to uphold current sight-unseen Bids continues for issues such as the Texas Type, Spanish Trail, and the Wisconsin when they are offered in pretty much any Mint State grade. Aside from the 12% decline in Bid for $2½ Sesquicentennials graded NGC MS64, most other Gold issues were able to avert similar pitfalls of discounting activity. Indications of continuing strength for Walkers are noticeably concentrated within the later-date MS63 thru MS65 columns this week. Many late date issues not necessarily partaking in the plus sign denoted upswing are certainly still seeing much demand and have visible, sight-unseen buyers at today's levels. Gem Walkers are now 41% higher since the beginning of the year, while Very Choice examples are up 22%. Action at the Summer FUN show this week is expected to perk up interest for much of the Type material that will be on display on the bourse floor, as well as for that made available to the highest Bidders during the auctions there. Some truly rare varieties and condition rarity items of various denominations should lure a large pool of anxious numismatic enthusiasts to this venue. As far as the sight-unseen market goes, the situation remains status quo for the most part.



Dollars are showing mixed results this week as Bids for many generic MS63 and MS65 graded issues are reacting contrarily to increases in the Bids of their MS64 graded counterparts, as well as to this week's slightly higher Silver Spot. Detached from this are 1921-D Morgans in MS65, a popular Type coin, which now has an anxious buyer willing to pay some 30% more, sight-unseen than last week. MS63 and MS64 Peace Dollars performed well, with the 1927 in MS64 posting a healthy 14% rise in Bid and early P-Mint issues in MS66 each gaining an average of 19% this week, rebounding well enough to regain their Bid levels of early last month.

The rise in Gold Spot this week has no doubt been positive for Gold Type material in this report. While sight-unseen Bids for many Gold Type issues are once again on the rise, as are most common Double Eagles in MS61 thru MS65, many Bidders participating in this sight-unseen segment apparently remain a bit daunted by Gold's volatility. Common date $20 Saints are higher in all grades up to and including MS65 since January, though Type III $20 Libs are actually lower by as much 6% in grades MS63-MS65 as seen in the chart. These Double Eagles and other Gold Type may get a further boost as the news coverage picks up regarding the legal status of the ten 1933 $20 Saints in the Langbord trial.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

CAC has evaluated over 200,000 coins with a market value over $1.1 billion. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are only placed on quality coins.

What's more, CAC is a powerful market maker for it's stickered coins. In fact, CAC has recently purchased over $175,000,000 worth of coins.

So the CAC sticker does not add value - It is just an easy way to identify coins that are solid for the grade. And it gives you confidence in the value of a coin.

The CAC sticker doesn't add value, it just helps to identify a quality coin.

Every Numismatic Library needs a complete set of the

COIN DEALER newsletter family of publications

Order Online www.greysheet.com

the Backsheet

Now that we have your attention, we really haven't started an additional newsletter — but your library should include **Back Issues** of our publications. Back issues are available two ways:

You can purchase small quantities to fill in missing issues, to obtain articles necessary for your research, or to follow your special interests. You may also combine your order for back issues of any of our publications to obtain the lowest price:

1-10 issues - $2.50 each • 11-25 issues - $2.00 each • 26 & over - $1.50 each

Or, you can purchase ***complete sets*** of back issues for really dramatic savings:

Complete set of the weekly **Coin Dealer newsletter** (*Greysheet*)
from June 14, 1963 to December 17, 2010, now includes 2,424 issues.
At $1.50 each this would normally cost $3,636, but a complete set
is only ..... **$2,425.**

Complete set of the monthly **CDN Monthly Supplement**
(formerly the Monthly Summary)
from August 1976 to December 2010, now includes 413 issues. At $1.50
each this would normally cost $619.50, but a complete set is only .... **$480.**

Complete set of the **CDN Quarterlies**
from January 1992, to December 2010, now includes 228 issues, a
complete set is only ..... **$250.**

Combined weekly **CDN** (*Greysheet*), **Monthly Supplement & Quarterlies**
now includes 3,065 issues, and extra savings at only ..... **$3,025.**

Complete set of the weekly **Certified Coin Dealer newsletter** (*Bluesheet*)
from August 22, 1986 to December 17, 2010, now includes 1,202 issues.
At $1.50 each this would normally cost $1,803, but a complete set
is only ..... **$1,260.**

Complete set of the monthly **Currency Dealer newsletter** (*Greensheet*)
from September 1980 to December 2010, now includes 364 issues.
At $1.50 each this would normally cost $546, but a complete set
is only ..... **$430.**

Gold Hits New All-Time Peak At $1,589
Walker Marathon Continues

Many dealers are attending local and regional shows as well as taking some personal time off before ramping up for the ANA World's Fair of Money in Chicago. This gathering is scheduled for August 16-20, and will include an auction by Stack's Bowers, the official auctioneer of this show through 2013. PNG will hold a pre-show for members and invited guests August 13-15 with set-up on Friday, August 12. Gold has reached an all-time high of $1,589—$274 above the year's low of $1,315 recorded January 27. In the last eight trading days, Spot has jumped over $100. Silver has made significant strides in a short time as well, increasing more than 15% over the same period to close at $38.69 per ounce.

While it is inarguable that the Walkers segment has been on fire for several months now, many key-date issues didn't necessarily partake in all the exuberance. But this week, strong sight-unseen Bids for many of the earliest Walker issues in grades MS61 thru MS64 suddenly emerged, as is particularly the case for such issues as the 1917 Obverse-D and the 1918-D. Affirmation of how hot this segment really is can be seen by instances such as the 38% Bid increase this week for the 1927-S in MS62, a better-date coin of modest grade, but one with a rather low combined pop of just 100, split evenly between PCGS and NGC. Although the higher Silver Spot exerted some positive influence over much of this segment, collector-based demand fundamentally persists in providing cause for the multiplicity of these higher levels. The liveliness of the sight-unseen Bidding activity that prevailed mostly among the late-date Merc issues last week has subsided for now. There is some hope of a continuation of strongly motivated Bidding action that may be induced by some new and, perhaps, even some key-date Merc material appearing at next month's ANA event in Chicago.

Silver Commemoratives are experiencing some of the most volatile trading activity seen in months. Activity is mixed as Bidders are willing to pay above current Bid in order to acquire certain issues while other issues are still being discounted at the same time. While Bids for many issues are merely regaining ground in select grades, issues such as the Texas Type are strongly in demand across the entire grading spectrum. Gold Commems remain very quiet this week, with no advances or declines to report. Type coins generally didn't "roar" as much as had been expected during the summer FUN show and auction in Orlando last week, perhaps, mostly due to coin market participants holding back in anticipation of seeing some much needed fresh material being offered during next month's show in Chicago. Yet, there is a noticeable stability pervading within this backbone segment of the market, as no major discounting involving any Type material has been reported.

Many dealers and collectors view the Dollar segment as the gauge for overall coin market activity, and this week's trading among the Morgans is very positive. Sight-unseen Bids rebounded to regain or increase their levels of prior weeks. Bidders are focused on both better-date and generic Morgans in all grades up thru MS65. Common dates in Gem are 19% higher with a sight-unseen Bid of $145. Peace issues had mixed results but, overall, their gains outnumbered their losses. Buyers are still targeting the high grades here as Type Bid moves to $2,500 for NGC MS67 examples. With Gold Spot closing just $15 shy of the next barrier of $1,600, there is expectation of another "Gold Rush" occurring as some dealers acted quickly by hitting other dealers' Asks through the electronic trading networks. Sight-unseen Bid has jumped 7% to $1,740 for Type III $20 Libs in MS62 which traded for as little as $1,555 in the past month. $20 Saint-Gaudens are also hot in grades through MS65 with examples graded MS64 by NGC now at $1,755, up $165 from last month.

David Lawrence Rare Coins has created a free iPad app which is specifically designed to allow clients to Bid on and purchase certified coins from the company's weekly auctions. Orders placed using this app include free standard shipping. The Missouri Numismatic Society will hold its 51st annual coin show July 28-30. Scotsman will host their Summer Auction July 29 in conjunction with the show. The sale will include 65 modern Chinese rarity lots, paper money, ancient and world coins, and of course US material as well. We have listed a few of the many highlights herein.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

CERTIFIED COIN DEALER newsletter

*CCDN — a weekly report on the **Sight-Unseen** certified market published by the Coin Dealer Newsletter (est. 1963)*

Vol. XXVI No. 29 | July 22, 2011 | Single copy price $4.00

Higher Bids Boost Market
Walkers Leading Sight-Unseen Race

A federal jury in the Langbord case gave a unanimous decision in the afternoon of July 20 that the 10 1933 $20 Saint-Gaudens belong to the US government. The coins were originally turned over to the government by the Langbords back in 2003 in order to establish authenticity, but once received, they were confiscated instead of returned. The suit for ownership was then filed by the Langbords. A number of dealers were in attendance at the PCGS Members only trade-and-grade in Las Vegas when the news of the trial results broke out. Many dealers expressed disappointment with this verdict, and at least one dealer was upset with the ruling as he believed to have potential new owners lined up and ready to buy these ultra rarities. The show runs through Saturday when dealers will continue preparations for the upcoming Chicago ANA show with their freshly made material in hand.

While most of the numerous sight-unseen Bid increases for Mercury Dimes are again small, the fact that this segment is experiencing its second consecutive week of widespread gains is most significant. This week, some Full Band designated semi key-date issues joined in on the fun, including the 1918 in MS67FB, which is up by 9%. Most noteworthy, the NGC graded 1919-S in MS66FB, a true rarity with a combined pop of 5 and only 1 finer, boosted up its Bid by an amazing 33% to $10,000. The rally persists this week within the Walker segment, as major advances affirm rising demand for the majority of common dates in grades MS62-MS66. While Bids for some Walkers are not necessarily advancing as aggressively as they had in past weeks, they, nonetheless, are firmly supported at current levels due to a widespread appeal for this series stemming from exuberant Type and date collectors comprising this demand pool. With generic Gem Walkers now at $125, up some 40% in three months, no signs of slowing are apparent. Sight-unseen Bids for many Silver Commems are continuing to firm up as they did last week with higher offers being quite prolific and significant. Despite this positive activity, some key issues, even those with relatively low pops, are in a stage of weakness and unable to avert persistent discounting. NGC Lafayette Dollars in MS65 are such an example, as Bid drops by $650, or nearly 12%. Within Gold Commems, both Lewis & Clark Dollars in MS65 and MS66 suffered pull-backs, as did $2½ Sesquicentennials through Gem, with Bid now well below $2,000 in MS65.

In contrast to the dormancy of last week, both Mint State and Proof Type now see tremendous Bid activity resulting in a mostly positive outcome. Just about every Large Cent is seeing increased demand, mostly in grades MS61 thru MS64 in all colors, along with comparably graded Indian Head Cents. A pair of obsolete denominations are higher including 2¢ pieces and 3¢ Nickels. Shield Nickels are mixed: those with Rays are upbeat through Very Choice, while those without are down in NGC MS65-MS66. As Proof Copper and Nickel issues appeared to have taken a breather, PR61 thru PR65 graded Barber Dimes and Quarters gained strength and popularity. PR61 thru PR64 Liberty Seated Halves with and without Motto have increased by as much as a whopping 63%. With Gold back under its all time record high of $1,602 an ounce, Bidders are being both selective and cautious with their sight-unseen offers for Gold Type. Uncertainty prevails as to Gold Spot's near future direction with significant volatility still occurring. Some rather substantial declines have been recorded for a few high-end fractionals such as $2½ Libs in NGC MS67. $3 Princesses are once again being targeted by way of higher sight-unseen offers for grades MS61-MS63.

Generic Dollars, both Morgan and Peace, are responding positively overall to the rebounding of Silver Spot to just above the $40 per ounce level. Some slightly better-date and even a few conditional rarities are continuing to be tested at public auctions, resulting in some slight declines. This can be seen within this week's Market column where the discounted retail auction price realized is preceded by the symbol "a". For example, despite its elusiveness and low combined pop of just 5 coins, the NGC MS66 graded 1890 had a bad week at auction, losing ¼ of its previous Bid. Gains among generic Peace Dollars this week are massive. Gems are now $34 higher, Bid $144 sight-unseen, with large quantities needed by market-makers.

The *CCDN Coin Market Index* has been on a fairly steady rise and is now at 967.91, fast approaching the 1,000 point baseline established in January 1990. Three of the core market segments have already eclipsed this mark, including Morgan Dollars, Buffalo Nickels and Proof Gold Type. At 988.65, Walkers appear to be next in line to reach the 1,000 point mark.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" – Lowest asking price during the week prior to publication (week old); "m" – Lowest asking price during the previous three weeks (month old); "t" – Trade during the most recent month; "lm" – Lowest asking price appearing last month; "lt" Trade appearing last month; "ot" Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

UPDATE!

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

CAC has evaluated over 200,000 coins with a market value over $1.1 billion. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are placed on only quality coins.

What's more, CAC is a powerful market maker for its stickered coins. In fact, CAC has recently purchased over $175,000,000 worth of coins.

So the CAC sticker does not add value - It is just an easy way to identify coins that are solid for the grade. And it gives you confidence in the value of a coin.

The CAC sticker doesn't add value, it just helps to identify a quality coin.

CERTIFIED COIN DEALER newsletter

Vol. XXVI No. 30 | July 29, 2011 | Single copy price $4.00

Action High In Sight-Unseen Market
Silver Commems Stabilize

Dealer-to-dealer trading through the electronic networks remains active as many dealers are attending local and regional shows while preparing for the big ANA gala in August. Over one million dollars changed hands sight-unseen through the Certified Coin Exchange this week alone. Such a healthy number demonstrates significant confidence in the sight-unseen market, and also suggests that dealers are generally satisfied with the quality of material they are receiving. As with all sight-unseen transactions, coins cannot be returned regardless of aesthetics. Over $750K of the million dollars in sight-unseen trades came from generic Gold. Gold Spot is a huge part of the equation and remains in record territory, currently at $1,613 with Silver quite healthy as well, as it climbs to $40 an ounce. Some are concerned that upon conclusion of the debt ceiling talks a minor correction in precious metals will take place, though, as usual, others believe the opposite insofar as this leg of the bull run is just getting started.

After last week's rather impressive sight-unseen Bidding activity, Mercury Dimes are holding onto their newly acquired Bids. Other than the 1940-D graded MS66FB, which posted a mild decline, Bids for all other Mercs sustained themselves throughout this week's trading. Late date Walkers in grades MS64 thru MS66 keep moving higher, taking no pause. This is now the sixth consecutive week of Bid increases for most of these issues. One date to highlight is the 1947-D in NGC MS67, a pop 43, as its Bid is up by another $200 and has risen altogether by $1,100 since the beginning of this summer's Walker rally. Seven NGC slabs of this date have sold at public auction since March 2009, ranging in price from $1,380 to $2,300, the latter being a Star example. PCGS has encapsulated 9 at the MS67 grade level, and are now Bid $3,000. The last PCGS example to sell at public auction was in February of 2007 when it brought $9,890.

Some market stabilization came about within Silver Commems after two weeks of widespread Bid increases. Higher Bids remain insufficient for many issues to recover the losses they have incurred during the past year. See the chart herein for a baker's dozen of the worst performing issues since January. A handful of Gold Commems have rebounded a bit. Both PCGS graded Lewis & Clark Gold Dollars in MS64 regained a nice chunk of their losses from the end of last month, the 1904 advancing by 45% since last week. MS62 $2½ Pan-Pacs and the Sesquicentennials in multiple grades saw good recovery as well, with PCGS Gems making a comeback to $2,000 Bid. The Type segment is currently stable, and this condition may very well be a cue that market-makers and collectors are preparing and revving up for the Type material offerings at the upcoming ANA World's Fair of Money in Chicago. No significant Bid advances can be reported this week aside from No Cent Liberty Nickels in MS66 and MS67, those of the latter grade advancing aggressively by as much as 20%. These one-year Type coins have a combined pop of only 70 with none graded higher. Overall, sight-unseen support for Copper, Nickel, and Silver issues in both Mint State and Proof is widespread and solid.

Market-makers are looking feverishly for Morgan and Peace Dollar keys as they remain deficient in better-date and higher quality inventory. Sight-unseen Bidders have offered considerably more for 1895 Proof Morgans in just about any grade. Gems are now 17% higher at $48K for either PCGS or NGC, which have a combined pop of 48. Common S-Mints such as the 1879, 1880, and 1881 increased 6% for any of the PCGS MS66 graded specimens. Generic Peace Dollars in MS63 are needed in quantity, and are now Bid $50 sight-unseen, just ship. In the MS65 grade column, the NGC certified 1922-S, a coin with a combined pop of 490, recouped some more of its drastic loss from six weeks ago when it fell from $1,240 to a Bid of $775, settling in this week at $850.

Gold Type is in an upward trajectory with only a single decline after weeks of mixed activity. Of course, this is due in part to Gold Spot remaining well above the $1,600 benchmark and just below its all-time high of $1,617 reached earlier this week. Yet, this segment is quite far from really being "on fire" as the upward pressure on Bids for most of this material has been persistent but incremental and gradual over the past several weeks.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Gold Breaks Record High Again And Again
Higher Sight-Unseen Bids Target NGC Type

Gold has been making waves lately, breaking another all-time high. Volatility followed this record for both the yellow and white metals. August 4 saw an intraday high for Gold of $1,683 before plummeting to $1,639, finally closing at $1,656. Silver peaked intraday at $42.37, tumbled to $38.10, and landed at $39.42. Stocks shared in this extreme volatility, the Dow suffering its worst day since the financial crisis of 2008, losing over 500 points, or 11% since July 21. Ideally, even with this significant volatility, demand for Gold and Silver remains high, keeping enthusiasm strong for the ANA World's Fair of Money and its associated auctions. A good deal of action is still taking place on CCE, where over $625K has already traded sight-unseen this week, consisting of primarily generic Dollars and common Double Eagles. Heritage will feature their Platinum Night sale August 12, and Stack's Bowers will have their own pre-show sale, August 13-14. We have listed highlights from both auctions herein.

Enlivened sight-unseen Bidding activity resumed this week for late-date Mercs. While the gains were modest again in dollar terms, the frequency of these upward movements lately within this segment may suggest that Bids are finally reflecting a recognized elusiveness associated with many of these issues. Such may be the case for the NGC graded 1945-S issues, with Bids up significantly across the entire grade spectrum. NGC has only designated 22 as qualifying for the Full Band designation in all grades. The heated sight-unseen Bidding that perpetuated last week's upward momentum among MS64 thru MS66 graded late-date Walkers now shifted to include many of these issues in grades MS62 and MS63 as well. At the high end of the grading spectrum, 1935 and 1945-S examples in grade MS67 advanced for the second time in two weeks. Demand for Walkers is so powerful that buyers are raising Bid for ANACS and ICG slabs in hopes of acquiring material.

Bids for NGC graded MS65 Lafayette Dollars rebounded to their previous level of a few weeks ago, as there apparently is too much demand for these quintessentially important Silver Commems to remain very long at a $650 reduction. The NGC graded MS63 and MS64 Hawaiian issues, the MS65 Monroe, and the MS67 New Rochelle issues, likewise, sprang back to their mid-July levels. A similar recovery of the Bids for some Gold issues such as both Lewis and Clark Dollars graded by NGC helped to restore some much needed confidence. Some life came back into the Type segment, particularly for NGC graded issues. Mint State Capped Bust, Liberty Seated With Motto, and Barber Halves in grades MS63 thru MS67 are hot now. Bids for their Proof peers advanced equally as well, along with those for Liberty Seated Dimes with Legend in high grade. PR67 Barber Halves are especially resonating, recouping their losses from previous weeks and advancing this week by more than 14% to new ground at $5,300. Morgan Dollars in grades PR65 thru PR67 made a comeback as well to their NGC Bid levels of three weeks ago.

Sight-unseen offers for Dollars are quite plentiful but aren't pouring in with the exuberance most would expect following this week's higher Silver Spot levels. Nonetheless, considerably higher Bids for early, better date Gem graded NGC Morgans played a major role in dominating the heated action within this segment. Generics grading MS64 edged up again in continuation of a gradual but steady pattern of ascension, now 8% higher since the start of the summer. Most Peace Dollars remained on level ground, while the 1934-D in NGC MS67, with its very low combined pop of just 4 coins and none finer, shot up in sight-unseen Bid by $1,000. GSA CC Dollars, both in original government holders and with NGC grade sticker, remain popular and are a bit higher. With Gold Spot breaking records regularly, generic Gold Type issues in the more bullion sensitive grades, of both small and large denomination, are reacting accordingly, with over 48 increases by as much as 8%, as is the case for the NGC $2½ Libs in MS67.

UPDATE!

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

^ 250,000

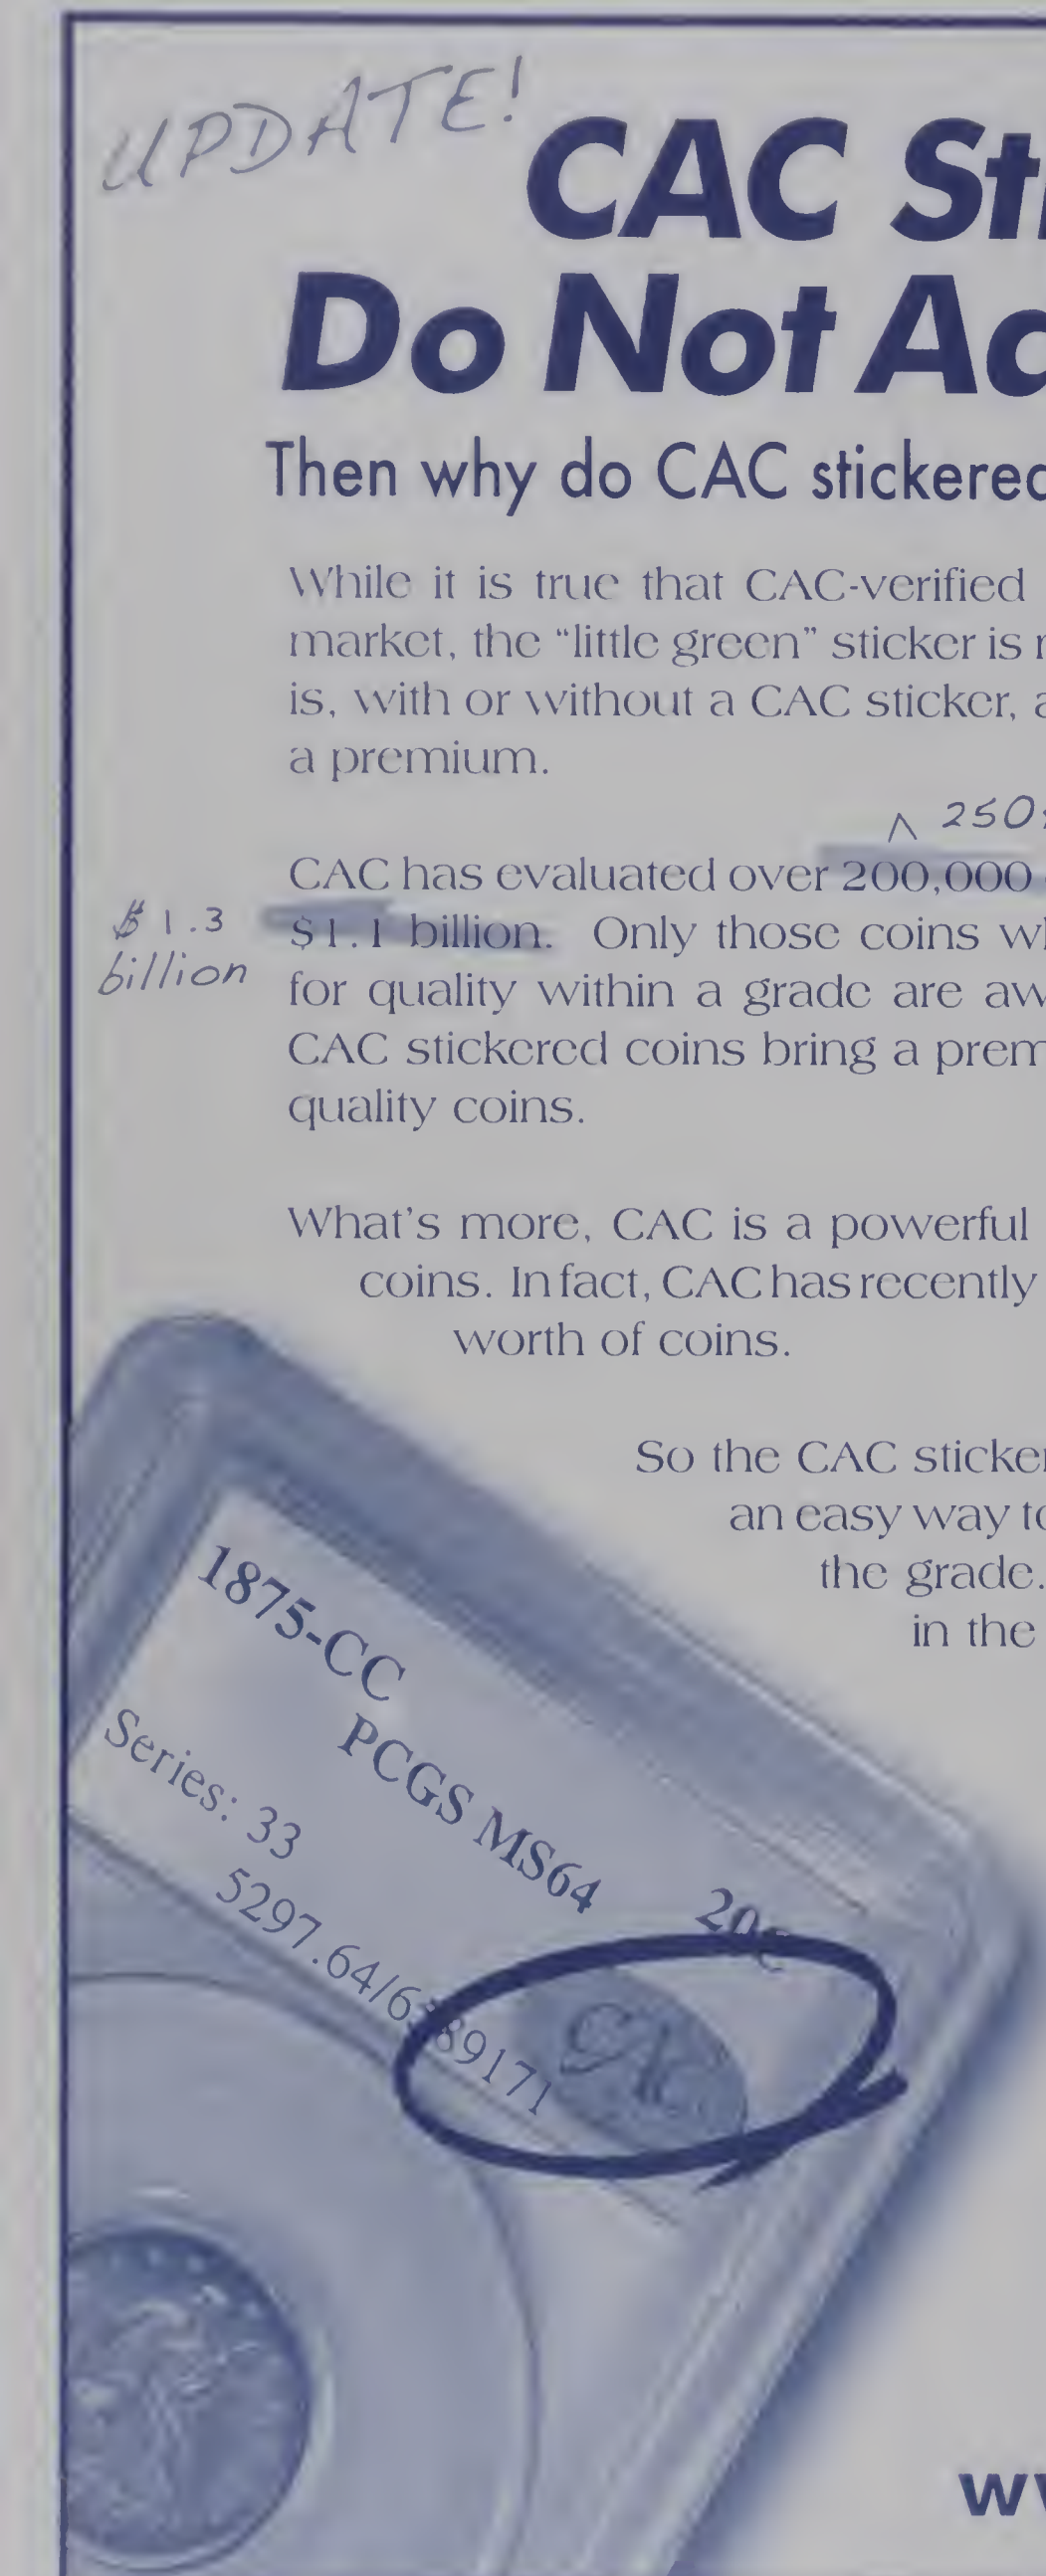
CAC has evaluated over 200,000 coins with a market value over $1.1 billion. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are placed on only quality coins.

$1.3 billion

What's more, CAC is a powerful market maker for its stickered coins. In fact, CAC has recently purchased over $175,000,000 worth of coins.

^ $200,000,000

So the CAC sticker does not add value - It is just an easy way to identify coins that are solid for the grade. And it gives you confidence in the value of a coin.



The CAC sticker doesn't add value, it just helps to identify a quality coin.

CERTIFIED COIN DEALER newsletter

*CCDN — a weekly report on the **Sight-Unseen** certified market published by the Coin Dealer Newsletter (est. 1963)*

Vol. XXVI No. 32 | August 12, 2011 | Single copy price $4.00

Do I Hear $1,800? Yes. Volumes Of Gold Type Trade Sight-Unseen

With Gold reaching stunningly high intraday levels, CCE participants have ratcheted up the action. Gold closed at yet another all-time record of $1,781 August 10, before shooting up further in after hours trading, surpassing $1,800 an ounce. Over $1.9 million in sight-unseen trades took place this week alone, including a 1907 $20 Saint-Gaudens in PCGS MS67 which brought $45,000. This is tied with the highest trade through CCE since February of 2011, when a $20 High Relief in PCGS MS65 found a new home. Buyer confidence in third-party grading is strong enough for eight coins to each have sold sight-unseen for five figures through the dealer-to-dealer trading networks since January. Tremendous numbers of Asks are being hit currently, which is now a common occurrence when Gold goes on a run. Half of the coins traded this week, with a total value of $1.64 million, were via the Ask mechanism. In the past, calm waters in the sight-unseen arena were the norm before a big show. Dealers wanted to remain as liquid as possible for upcoming purchases. Things are different now, with daily spikes in Gold Spot by as much as $60 and a 50% increase from a year ago when Spot was less than $1,200 an ounce. This can be seen in the chart below along with the 15 leading Mint State Gold Type issues over the past 12 months.

The auctions surrounding the ANA World's Fair of Money are offering a small but astoundingly high quality group of Mercury Dimes, possessing eye-appealingly gorgeous luster and toning. Many are condition rarities, along with several scarce-date issues. Nonetheless, there should be much enthusiastic and competitive Bidding along with an element of entertaining spectacle as these extremely low pop coins come up for sale. After last week's barrage of higher sight-unseen Bids, Mercs are holding strong with buyers still in need. Sight-unseen Bidding action within the Walker segment remains extremely robust at current levels after two months of non-stop increases, week after week. This has been one of, if not *the* most active segment of the entire generic market all summer. This week's calm, for all but Gold, is a normal pattern before a big show as Bidders need to consolidate their energy and resources in preparation for serious focus upon the scheduled events due to occur in Chicago. After weeks of rather volatile activity affecting both Gold and Silver Commems, the dust is now settling within this segment with not one issue posting either a loss or a gain this week. However, Commems are trading, albeit at lower levels. Exceptional quality material featured among items expected to appear on the bourse and among the lots being auctioned by Heritage and Stack's-Bowers in Chicago this week and next may provide a buying opportunity. At least one dealer has been retailing a large group of these Commems for prices based on the following formula using the *Greysheet*: PCGS at Bid, PCGS/CAC at Ask, NGC at Bid minus 15%, NGC/CAC at Bid.

NGC Proof issues that had increased last week are again reaching for yet higher levels this go round. Liberty Seated Halves With Motto in NGC PR66 are now at $3,600 for this Type with a pop of 665 with 274 graded higher. Barber Halves in PR63 and PR65 kept up the heat for Bidders who also appear hot for those PR64 thru PR67 Morgan Dollars, as these issues are also up again, this week by $100 in each of these grade columns. Both Morgan and Peace Dollars remain sought after with thousands of generic slabs trading regularly at current levels. Blast white examples are receiving only slight premiums over toned examples, specifically, $3, $3 and $5 for MS63, MS64 and MS65, respectively. The 1921-D has a combined pop of 79 in MS64PL and just 18 in MS65PL, and each are now Bid $100 higher. The 1921-S is also needed at higher levels in MS63PL and MS64PL as these coins of which only 25 exist in all grades have become increasingly sought after.

The new all-time high Gold Spot, driven up by what observers note as panic buying due to the fear pervading the financial markets around the globe, seems almost surreal in terms of the rapidity with which the yellow metal's price has been rising. Since the start of this summer, Bids for MS61 thru MS65 $20 Type III Libs are up by an average of 21% while those for $20 Saints within the same grade range are up by 22%.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Every Numismatic Library needs a complete set of the

COIN DEALER newsletter family of publications

Order Online www.greysheet.com

the Backsheet

Now that we have your attention, we really haven't started an additional newsletter — but your library should include **Back Issues** of our publications. Back issues are available two ways:

You can purchase small quantities to fill in missing issues, to obtain articles necessary for your research, or to follow your special interests. You may also combine your order for back issues of any of our publications to obtain the lowest price:

1-10 issues - $2.50 each • 11-25 issues - $2.00 each • 26 & over - $1.50 each

Or, you can purchase ***complete sets*** of back issues for really dramatic savings:

Complete set of the weekly **Coin Dealer newsletter** (*Greysheet*)
from June 14, 1963 to December 17, 2010, now includes 2,424 issues.
At $1.50 each this would normally cost $3,636, but a complete set
is only ..... **$2,425.**

Complete set of the monthly **CDN Monthly Supplement**
(formerly the Monthly Summary)
from August 1976 to December 2010, now includes 413 issues. At $1.50
each this would normally cost $619.50, but a complete set is only .... **$480.**

Complete set of the **CDN Quarterlies**
from January 1992, to December 2010, now includes 228 issues, a
complete set is only ..... **$250.**

Combined weekly **CDN** (*Greysheet*), **Monthly Supplement & Quarterlies**
now includes 3,065 issues, and extra savings at only ..... **$3,025.**

Complete set of the weekly **Certified Coin Dealer newsletter** (*Bluesheet*)
from August 22, 1986 to December 17, 2010, now includes 1,202 issues.
At $1.50 each this would normally cost $1,803, but a complete set

Gold Glitters At ANA
Silver Dollars Shine

Gold seems unstoppable lately. With a recent intraday high of $1,827 and a close of $1,819, both have set new records. Strength in Gold Spot bodes well for coin shows, and this year's ANA World's Fair of Money benefited significantly. Certainly, the pre-ANA action was strong with regard to auctions. Heritage hammered $31 million from its Platinum Night sale, and Stack's Bowers brought in $3.1 million in their much smaller pre-show offering. Of course, as the official auction house of the ANA, it is expected that Stack's Bowers results will bring the overall combined auction total to well over $50 million.

Perhaps the summer rally we've been seeing among the Walkers is taking a breather, but there is little to complain about the performance of this series as sight-unseen Bids for virtually all Mint State issues are holding firmly in their newly acquired higher levels. One of the few exceptions is the 1918-D graded PCGS MS64, an early-date favorite with a combined pop of 488 and just 45 finer, down just slightly. Walkers have a fairly large representation at the auction venues this week in Chicago, and market participants are expecting strong activity with more positive results in store for this segment. The first session of the Stack's Bowers pre-show auction at the ANA World's Fair of Money in Chicago featured a large number of high quality PCGS and NGC graded Silver Commems, many of which were of the Guttag Family Collection with + designations and appealing original toning. Impressively strong prices were realized, especially for specimens of exceptional eye-appeal and with CAC approval. But this positive energy at the auction venues had little in-kind effect upon the overall Commem segment, as there were a few declines posted within both the PCGS and NGC columns this week. Among high grade Gold Commems, Bids for some NGC issues were particularly hard hit again, with the $1 1904 Lewis & Clark issue in MS66 posting a 16% decline.

Common date Morgan Dollars are advancing again, with MS65 examples posting gains of nearly 5% to $155. Generics in MS63 and MS64 are also shining at $50 and $70 respectively. Despite moderate declines denoted for some better-date issues, the predominance of the upside momentum throughout this sight-unseen segment is quite apparent. Peace Dollars are active with common dates remaining strong at current levels, although a handful of slightly better dates are declining. One bright spot among the group, however, includes the 1922, up 20% in NGC MS67, now Bid $3,000. Gold Spot continues to surge well past the $1,800 level, and news of its rapid rise is being broadcast throughout the mainstream airwaves with increased frequency. Consequently, higher Bids resulted again for most generic issues, as PCGS graded $10 Libs and Indians in MS65 increase by 16% and 20% respectively. Add a CAC sticker to MS65 $10 Libs and sight-unseen Bid jumps from $3,200 to $4,550. Common date Double Eagles jumped across-the-board by as much as $50.

On August 22, 2011, twenty-five Proof Sets, from 1883-1916, dubbed "The Time Capsule Original Proof Set Collection" will be sold by Centennial Auctions in Nashua, New Hampshire. The Proof Sets include 1¢ through $1, and include an 1895 $1 graded PR67+. The vast majority of these coins have been encapsulated by NGC and four are finest knowns, including: 1902 10¢, in PR67+; 1906 1¢ PR67★RB; 1913 Type II 5¢ PR68+ (also qualifying as the finest known Matte Proof Buffalo); and the 1914 10¢ PR68.

Next up is the Long Beach Expo with an auction by Heritage September 8-10. Ira and Larry Goldberg will kick things off with their pre-Expo sale, September 4. This auction will feature many high-grade, low pop rarities, some of which are listed herein among the highlights.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

MARKET CONSOLIDATES
PRIMARY STRENGTH DISPLAYED AT AUCTION
ACTIVITY
. . .across the market
by Kevin Foley
The outlook for the collectable currency marketplace appears materially brighter than at this time one year ago. As 2008 drew to a close, the peak levels of an overheated market had been reached and were clearly a thing of the past. Transactions were contracting, both as to their overall numbers and the levels at which they were taking place. A general air of trepidation as to what the future held in refining the market. Dealers were reluctant to buy for fear that more attractive prices would likely be available from the simple expedient of waiting. Buyers were confronted with contradictory price levels, both with unrealistic auction reserves and private sale offerings at yesterday's much stronger prices from sellers reluctant to accept the sad, yet undeniable, reality that their stock was no longer worth what they had paid. Indeed, it was difficult to know where levels really were as those who remained market-makers bought and sold at what the current interplay of supply and demand dictated, while others sought to transfer the consequences of a decline in value of their inventories onto the shoulders of buyers less informed of the new lower levels than they should be. The one bright spot yet in evidence a year ago was that auction sell-through rates remained at a higher level than might have been expected in a market that was truly collapsing, rather than simply undergoing a price correction to rebalance supply and demand at more rational price levels.
As we move in to the new year, what might to some have seemed a looming depression in the numismatic world has clearly not come to pass. The various auction companies active in the currency trade are conducting sales consistent in size with their offerings of a few years ago, although the product mix has clearly changed. Ultra rarities that once commanded mid six-figure and higher prices are far less often available at auction now, as sellers of such items wait for a hoped for return to higher levels for such items. While overall prices undeniably remain significantly lower than two years ago, auction sell-through rates, a real measure of the balance between seller and buyer price expectations, continue to suggest growing levels of underlying demand promoted by the lower prices currently in effect.
LARGE SIZE TYPE NOTES
Prices for Large Size Type continue to slowly recover, rather than continue to fall. PCGS and PMG certification has become a near necessity for any item represented as being some degree of Uncirculated. Indeed, driven by the concept of registry sets, where buyers compete against each other to claim boasting rights to the finest holdings in various categories, the two certification firms have invented a clever way of promoting demand for their product at the very end of the marketplace. Here, there actually exists the most logical and useful demand for their services, i.e. the upper end of the necessarily somewhat subjective quality spectrum in the 11 point Uncirculated range, where a single point can mean an especially significant difference in what a buyer might be willing to pay, based solely on the third party grade label attached to an item. For virtually every large size Note the population of individual examples certified as 66 or higher is very often in the single digits. Any additional demand as all created by registry set buyers where such grade scarcity exists can markedly steepen the slope of the price gradient and thus serve as an advertisement for the value of third-party grading.
SMALL SIZE TYPE NOTES
Price levels here also continue to recover, with significant interest being focused on low and fancy serial numbers, as well as scarcer Star Notes. Indeed, the marketplace for low and fancy serials since skims at a convexity where dense exponentially rarer than more ordinary items of the same type sold for relatively modest premiums, has now expanded to the point that there are multiple market makers in this specialty, and it has become a real mainstream area appealing to a much broader purchasing base than applied a decade ago. While third party certification has not penetrated here to the same extent that it has in the Large Size specialty, a trend in that direction is very clearly present and premiums at the upper end of the Uncirculated spectrum are widening for such certified material, especially versus similarly described uncertified items. Error Notes remain a popular collector driven specialty.
FRACTIONAL CURRENCY
Fractional Currency remains very much a collector, as opposed to a speculator dominated, area, with price levels for very attractive material of a given scarcity remaining well below that of Large and Small Size Type Notes. Ultra rare items here remain available at auction at price levels that are a small fraction of Large Size Type material with similar populations. Exceptionally well centered Notes, regardless of how common, continue to generate significant demand and are easily saleable even when somewhat aggressively priced.
NATIONAL BANK NOTES
National Bank Notes, comprised of multiple geographic specialty areas, remain more spotty than the other collecting specialties. Scarce to rare material from in demand states can sell quite strongly, sometimes surprisingly strongly, at auction, while material from areas enjoying a less robust following will command only levels that can leave sellers feeling somewhere between frustrated and quite disappointed. It can be a hard lesson to learn in any collectables marketplace, but there is a real distinction between what sellers think something ought to be worth and what it currently is worth based on the interplay of potential owners competing against each other at auction. What the seller paid, what he wanted or what he thought the item should be worth is really quite irrelevant to the entire process. Some never seem to figure this out.
MISCELLANEOUS
Obsoletes continue to be a bright spot in the market, with rare material enjoying a broad and growing demand. This remains an area driven by informed collectors, with very little involvement by the third party certification firms. The exception as for extremely common items that can be marketed as 67 or higher to buyers more impressed by the certified grade label than the ease or challenge of locating and acquiring an item.

UPDATE!

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

CAC has evaluated over 200,000 (^ 250,000) coins with a market value over $1.1 billion (~~$1.1~~ $1.3 billion). Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are placed on only quality coins.

What's more, CAC is a powerful market maker for its stickered coins. In fact, CAC has recently purchased over $175,000,000 (^ ~~$175,000,000~~ $200,000,000) worth of coins.

So the CAC sticker does not add value - It is just an easy way to identify coins that are solid for the grade. And it gives you confidence in the value of a coin.

The CAC sticker doesn't add value, it just helps to identify a quality coin.

Gold Sees Correction
Bluesheet Celebrates 25th Anniversary

Market participants are expecting that much of the new material recently acquired by dealers at the ANA World's Fair of Money in Chicago last week will be appearing at the next big event in Long Beach early this September. Whether or not this is the case, Mercury Dime enthusiasts are sure to partake in the Heritage auction as a number of high-grade and scarce specimens will be going up on the auction block, including a not-so-often seen 1920-S graded MS65FB by NGC. This coin has a combined pop of 42 with just 14 finer. Walkers are awakening again, but only MS64, later-date issues are re-igniting the positive activity of weeks past within this segment. Two very scarce, CAC approved Walkers should elicit some heated Bidding during the Heritage auction in Long Beach, September 8-11: 1917-S NGC MS65 with reverse mintmark, and a beautifully struck, untoned 1940-S in PCGS MS67, this latter coin having a combined pop of only 13 with 1 finer.

The few advances and declines within the Silver Commem columns were moderate compared to those of past weeks, but that should not dispel any notion that the discounting of certain Commem issues won't continue in the weeks ahead. Liquidity is a major concern among some dealers as of late. Nonetheless, some outstanding quality Silver Commems will be featured among the lots presented during the upcoming sales surrounding the Long Beach Expo, including a beautifully toned Lafayette Dollar in PCGS MS65 and a magnificent condition rarity, New Rochelle issue graded NGC MS67PL+ CAC. Type remained quite devoid of the enlivened activity that normally is expected to occur after major events such as those of last week in Chicago. While sight-unseen Bids for most material are still holding up well, a few NGC Capped Bust issues saw some discounting activity, and two PCGS Proof slabs incurred significant setbacks this week. A 25% decline in Bid for Liberty Seated Quarters with Arrows in PR65 took these rather scarce issues down by as much as $750 below their identically graded NGC peers. Bid for No Motto Liberty Seated Dollars in PCGS PR64, which rose to as high as $6,000 at the start of the summer, was knocked down again by another $475 this week to a Bid of $4,700. A Gem Liberty Seated Half Dime With Legend sold at the ANA auction for $460, while sight-unseen Bid stood at $550 for any MS65 example graded by NGC. This is one of a half dozen NGC slabs within this segment leaving money on the table in Chicago as seen in this week's Market columns. Sight-unseen Bids for generic Morgan Dollars graded MS63 again added more muscle this week, their rise accompanied by a more than 20% increase for their MS66 peers in some cases. Morgans grading MS66 now Bid higher at $290, though recently have sold for as little as $300 at retail public auction, as shown in this week's Market columns. Mint State Peace Dollars remain in solid demand at current Bid across the entire grading spectrum.

With Gold plummeting $104 August 24, just 48 hours after its all-time peak of $1,889, this represents the largest single day decline since January 22, 1980 when Spot dropped $155 to $670. The same scenario also occurred with Platinum when it closed at a record high of $2,271 on March 5, 2008, then fell $159 just two days later, again representing the single largest one-day decline. Silver also saw a record one-day drop shortly following its most recent peak of $48.59 back on April 29, when the white metal spiraled down $3.50 just four days after hitting its most recent zenith. The yellow metal now appears to be rebounding from its low of the week, and Bid declines for most Gold Type were relatively in sync with the drop in Gold Spot. On the positive side, generic $20 Saints graded MS66 continued to gain ground, advancing by another $100 this week to the $2,500 level. Sight-unseen Bids for $4 Stellas graded PCGS PR65 and PR66 are each $10,000 higher now, while NGC PR62 specimens are lower by $3,500. Also this week, a whopping $47,500 captured a $10 Draped Bust Large Eagle in a PCGS MS63 holder through CCE, sight-unseen.

The Time Capsule Original Proof Set Collection sold through Centennial Auctions on August 22 realized over $1.5 million. Among the many highlights were an 1895 Proof Set which sold for $258,750; an 1896 Proof Set, which hammered home $67,275 and an 1897 Proof Set that brought in $68,425. A few Sets were broken up and their coins were sold separately, including a 1914 Barber Dime, graded PR68 by NGC, which sold for $10,350.

This week marks the 25th anniversary of *the Certified Coin Dealer Newsletter*. This newsletter was created out of the necessity to report on sight-unseen trading which grew rapidly with the advent of third-party grading and encapsulation services. At the time, common date Morgan Dollars in MS65 Bid $450 for ANACS; $165 for NCI; and $475 for PCGS. Generic $20 Saint-Gaudens in Gem were Bid $4,000; $1,375; and $3,850, respectively. For added perspective, Silver Spot was $5.08 per ounce, and Gold was trading at $374. NGC was included in the *Bluesheet* February 12 of 1988.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows, and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" – Lowest asking price during the week prior to publication (week old); "m" – Lowest asking price during the previous three weeks (month old); "t" – Trade during the most recent month; "lm" – Lowest asking price appearing last month; "lt" Trade appearing last month; "ot" Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

UPDATE!

CAC Stickers Do Not Add Value!

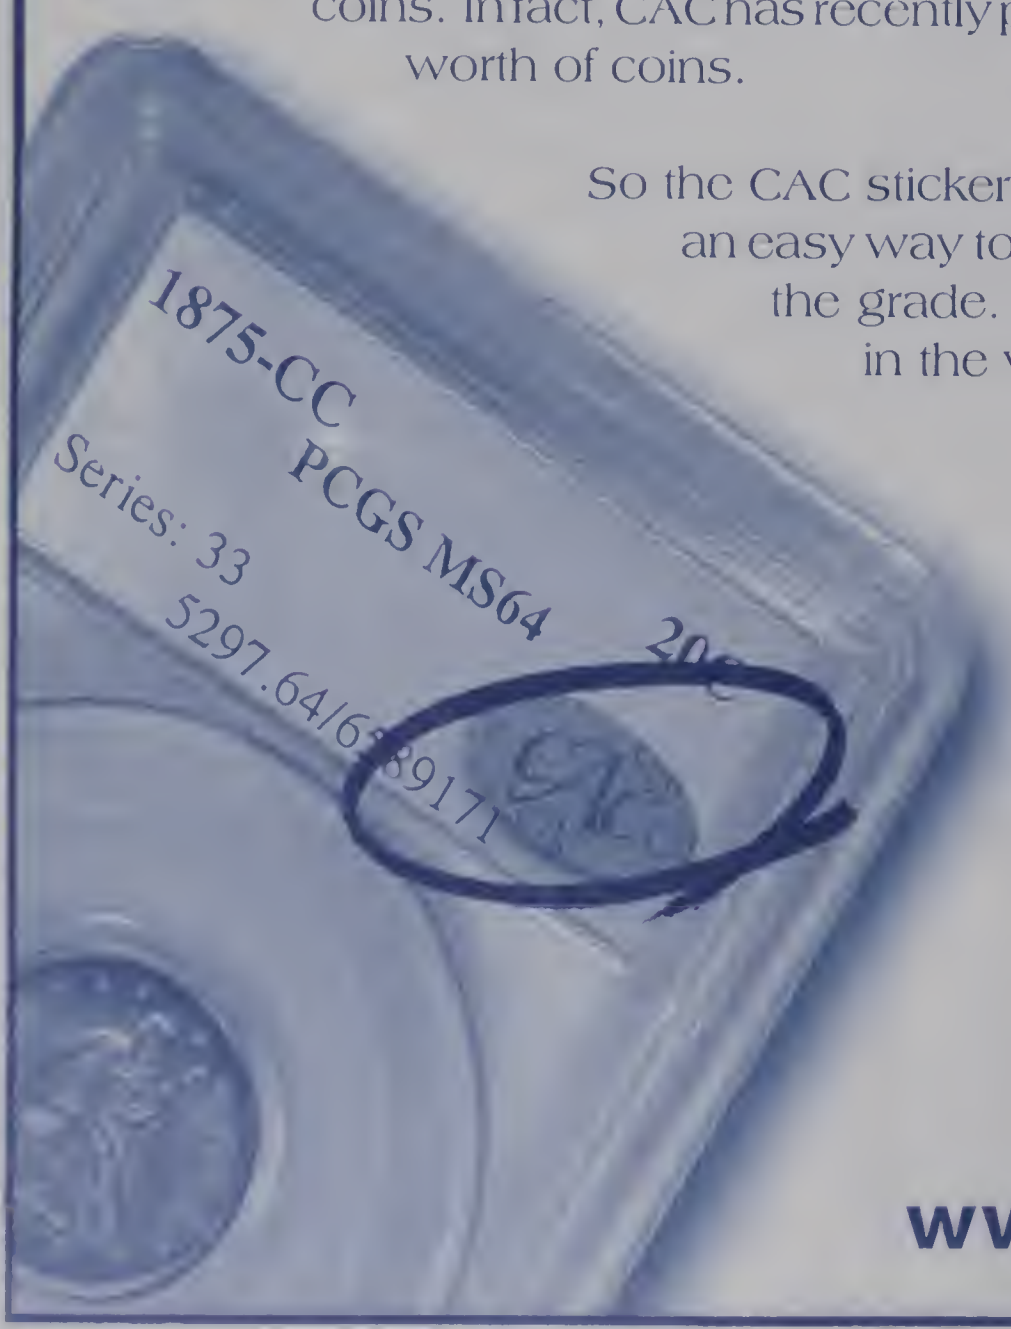
Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

CAC has evaluated over 200,000 (^ 250,000) coins with a market value over $1.1 billion (~$1.3 billion). Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are placed on only quality coins.

What's more, CAC is a powerful market maker for its stickered coins. In fact, CAC has recently purchased over $175,000,000 (^ ~$200,000,000) worth of coins.

So the CAC sticker does not add value - It is just an easy way to identify coins that are solid for the grade. And it gives you confidence in the value of a coin.



The CAC sticker doesn't add value, it just helps to identify a quality coin.

Vol. XXVI No. 35 | September 2, 2011 | Single copy price $4.00

Premiums Rise For Gold Type PCGS Peace Dollars Power Up

The start of September always reminds of summer's end each year, and this was among the most positive of summers in recent times for the overall coin market. Mercury Dimes proved to have a dedicated base of enthusiasts, as sight-unseen Bids for many issues edged higher this season. This week, the classic 1942/41-D posted impressively higher Bids for Full Band examples in MS64-MS66. Examples of the Philadelphia overdate also increased in NGC MS64FB. Generally positive energy continues to imbue the sight-unseen Bidding activity for the Morgan Dollar series. While there were only a few Bid increases this week, the gains were considerable. The 1890-CC in PCGS MS65 jumped by 10%, while the 1891-S, in PCGS MS64 DMPL and NGC MS64 DPL, surged by as much as an astonishing 87%. PCGS Peace Dollars have become hot commodities, as plus signs target better dates in grades MS62-MS67. More than three dozen increases, including multiple 4-digit advances, are in place as dealers hope to pry some of these top pops loose. A complete set of Very Choice examples has a sight-unseen Bid total of $11,361 and are readily available for the most part. At $3,500, the 1934-S could be considered the stopper, though 550 have been graded MS64 by PCGS with 200 graded higher.

While a steady flow of sight-unseen Bids for Mint State Walkers is still evident, demand has somewhat quelled in recent weeks as fewer offers have been exceeding current Bid. Still, multiple buyers remain visible and available for quantities of virtually every date and mintmark in various grades. A couple of increases to take note of include the 1941-S in MS65, now higher at $500, while the 1946-S in PCGS plastic is up to $1,800 in MS67. If there is a sight-unseen segment that deserves recognition as one of the most volatile of all this summer, it should be the Commems—both Gold and Silver. Many of these issues often experienced wide swings in both directions all summer long. Several actually regained their sight-unseen Bid levels from the start of the season. There are many who appreciate them for their beauty, historical context, and educational value, aside from their long-term potential as collectible coins. Few changes appear this week including a moderate reduction in Bid for the Antietam issue in PCGS MS65 and MS66. The sight-unseen market for Gold Commems is strong with dealers paying Bid for most issues in multiple grades. All is rather quiet in the sight-unseen Type market, especially among the Proof issues. The only noise made this week was a pretty loud bang by Liberty Seated Half Dimes (No Stars) graded NGC MS67, soaring to a 32% higher Bid. Their No Drapery peers in NGC MS66 and several lower Mint State grades have increased as well. Most denominations of Capped Bust, Liberty Seated, and Barber issues remain strongly in demand in virtually all Mint State and Proof grades at current levels.

The mild drop in Gold Spot bore little, if any, weight upon the Gold Type segment this week as mostly lower graded Mint State generic issues persisted in their advances. Premiums for generic Double Eagles are continuing to increase as they have for some time now. Even so, most dealers continue to recommend these for their numismatic value at a price that is not much more than bullion. $2½ Indians in MS64 and MS65 are edging higher to keep in sync with the strong demand seen these past weeks for their higher graded peers. The resiliency of Gold Spot, as it holds well above $1,800 an ounce, should bode well for the upcoming auctions surrounding the Long Beach Expo.

PNG has formed a coin doctoring definition committee. In July of 2010, the PNG did adopt a definition of coin doctoring which was ultimately rescinded in January 2011. The committee will draft a new, "exhaustive but concise definition," according to Jeffrey Bernberg, PNG President. John Albanese, President of CAC and the National Consumer Alliance, is heading the committee. He states, "Our job is to specifically define coin doctoring so we can better protect consumers from buying coins that have been tampered with in a manner meant to deceptively alter a coin, and thus, affect the long-term value of their investment." Spink Smythe held a public auction August 31 in New York featuring the Waldman Collection. The total price realized was over $859K. A few of the NGC Quarter Eagle highlights include: 1908 PR67, $37,375; 1909 PR65, $29,900; and a 1911 PR68 for $48,875. In addition, a 1929 Half Eagle graded PCGS MS64 brought in $46K, and an 1870 Type II $20 Liberty in NGC MS63 hammered home $46K as well. Numismatic action will ramp up with the Long Beach Expo September 8-10 with an official auction by Heritage. Of course the pre-show auctions will get things started as Ira and Larry Goldberg will hold their sale beginning September 4 in Beverly Hills, as will Bonhams, in Los Angeles. It has been reported that, unlike previous Long Beach shows, NGC will not be accepting coins for on-site grading.

UPDATE!

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

CAC has evaluated over 200,000 coins with a market value over $1.1 billion. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are placed on only quality coins.

What's more, CAC is a powerful market maker for its stickered coins. In fact, CAC has recently purchased over $175,000,000 worth of coins.

So the CAC sticker does not add value - It is just an easy way to identify coins that are solid for the grade. And it gives you confidence in the value of a coin.

The CAC sticker doesn't add value, it just helps to identify a quality coin.

Generic Silver Slides Golden Roller Coaster Rides

The Long Beach Expo got underway with an active set-up day September 7. PCGS has brought back the complementary food and beverages for dealers during set-up which was much appreciated, especially this time around when, with the intense heat, a "cold one" lifted spirits considerably on a weak day for Gold. The yellow metal took a $54 dip on Wednesday, but has come back up on opening day of the show to $1,854 per ounce, a $44 move skyward. Up until now, sight-unseen Bidders for Walking Liberty Halves appeared undaunted by the economic recession concerns that have been negatively impacting various other segments of the coin market. This week, Bids for MS65 and MS66 graded late-date issues have retracted by between 4% to more than 9% in some cases. But better-date, higher-grade issues are still faring extremely well as are the common dates in MS64 and lower. Among the Walker lots that drew much attention during the Goldberg pre-Long Beach sale this week were two PCGS graded, CAC approved specimens: a 1919 graded MS66 that sold for $15,525, while an MS67 1938-D raked in $10,925.

There remains a shortage of truly fresh and original Mercury Dime material to fill collectors' want lists. This week's auction results revealed a fairly good sell-through rate for the Mercs that were offered during the Goldberg pre-Long Beach auction, and indications are that this segment still has much stamina and a visible following of devotees. A 1921-D graded MS64 by NGC sold for just over $2,000, a bit below its estimate, but still a respectable amount. Another NGC graded, and condition rarity, 1942-D in MS68FB, having a combined pop of 34 coins with none finer, realized $805. Although many Silver Commem issues have been having a tough year, exceptional quality specimens with low pops and CAC approval are still capable of demanding very strong prices at auctions. A beautiful, light pastel-toned 1948-D Booker T. Washington graded PCGS MS67 with CAC approval fetched a hefty $2,645 during the Goldberg sale while sight-unseen Bids for virtually all Silver and Gold issues remained unchanged from last week with only 3 minor declines within the Silver segment.

This week's auction activity provided most of the noteworthy details pertaining to the Type segment. There was evidence of market weakness as some Mint State and Proof Type material failed to either meet reserves or even realize current wholesale Bid. However, very rare and early Coppers from the renowned Davy Collection drew heated, competitive Bidding which resulted in strong prices paid. Proof Barber material of extraordinary quality also did well. An 1898 Quarter graded NGC PR68 UCam sold for $9,787, well above its estimate, while an 1895 PR68★ CAC approved Half, also graded by NGC and described as a "monster coin," realized $15,525. Virtually every sight-unseen Bid decline for a Morgan Dollar fell in line with a generic issue, mostly within the MS63 and MS65 grade columns, and was largely attributed to a lower Silver Spot. Not a single Peace Dollar was affected by the mild downturn in Silver, as current Bid support for this series staved off any potential declines. One of the major market-makers in generic Dollars is in Long Beach actively looking for 3,000 untoned MS63 Morgans. Toned examples are receding a bit in both Choice and Gem. ANACS is preparing to grade GSA Morgan Dollars in their original black plastic government cases using a tamper evident wraparound sticker displaying the grade. NGC has been grading these in the same fashion for several years now with sight-unseen Bids listed on Page D, published the first week of the month in *the Bluesheet*.

This week's Golden roller coaster ride peaking over $1,920 before plummeting to the $1,800 per ounce range then returning to over $1,850 caused little, if any, shake-up in terms of the sight-unseen Gold Type Bidding activities. While Bids for some fractional denominations and $20 Saints in MS61 to MS62 receded just slightly, $2½, $5, and $10 Indians, as well as all three varieties of $20 Libs, are seeing good retention across the entire grade range at current Bid levels. A rare 1875 $3 Proof Indian Princess, one of only 20 pieces minted and graded PR60 by PCGS, sold for $83,375 during the Goldberg pre-Long Beach auction. Pre-Long Beach action has been considerable. Bonhams scored $1.4 million in their Los Angeles auction September 4. The Goldberg auction, held September 4-6 near Beverly Hills, hammered a total of over $9 million. We have included several of their many highlights herein. Heritage, the official auctioneer of the expo, will conclude their sale, which is now underway, September 12. The rare coin caravan will have little time to rest following Long Beach as Whitman will hold their next show September 15-17 in Philadelphia, with Stack's Bowers as the official auction house. Their sale is scheduled for September 14-16.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

Milestone after Milestone, CAC is Leading the Charge!

CAC was founded over three years ago by leading members of the numismatic community to set forth stringent standards for quality within a grade. Before CAC, prices for the solid quality coins were tethered to their lesser quality counterparts, thus holding down the market. Today, CAC is leading the charge to identify coins that fully merit the grade it was assigned. Now, advanced collectors and novices alike have an easy way to identify coins that are solid for the grade - look for the CAC sticker.

CAC continues to leap impressive milestones at breakneck speed, while giving you confidence in the value of a coin.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Standing Liberty Quarters Surge Increasing Demand Targets Generic Morgans

A very successful Long Beach Expo is now in the books, where a combined total of $40 million changed hands in multiple retail public auctions surrounding the show. Dealers are now in Philadelphia where they have been all week, doing yet more business. Well before the official start of the Whitman gala, September 15, some participants were holding their own mini-bourse sales while others were viewing lots, meeting with clients and setting up deals. There is indeed plenty of numismatic action currently on the east coast with more to follow. The ANA will hold its very first Fall show in Pittsburgh, October 13-15.

Silver and Gold Commems are two of the stronger segments within the sight-unseen marketplace. Most issues have visible Bids at the current published levels here with eager dealers ready to buy. This is somewhat difficult to comprehend when so many examples are being sold at auction for a discount. Gem PCGS '35-S San Diegos sold at public auction for 20% under sight-unseen Bid this past week. Among a dozen other examples, the Spanish Trail in PCGS MS63 also left money on the table to the tune of $125. The Arkansas 1939 PDS Set in MS66, one of the few issues lacking a solid sight-unseen Bid here, couldn't quite fetch it all during an on-line auction, and its NGC Bid slid by 15%. Adding to the quivers are declining Bids for the Hawaiian issue in various grades and the 8% drop in Bid for the NGC Sesquicentennial in MS65. One positive note concerns the PCGS 1948 Booker T. Washington PDS Set in MS67, which rose by $300 for this pop 2 trio. Both Gold and Silver Commems are well represented by an extensive selection of high quality material being featured during this week's Stack's Bowers auction in Philadelphia, many from the renowned Guttag Family Collection.

Even though Silver Spot has once again dropped below the $40 per ounce level, sight-unseen Bids for MS63 thru MS65 generic Morgan Dollars are up slightly. Demand is increasing as these cartwheels represent a viable alternative to American Silver Eagles for TV sales and other mass market promotions. Other than the 1882-S in MS67, the 1883-O and the 1904 in NGC MS66, Bids for all other Morgan and Peace Dollars averted significant declines. Bids for virtually all Mint State Type coins remain solid with exceptionally high quality material often commanding strong premiums, as was seen by the recent past auction results during the September 8-10 Long Beach Expo. Liberty Seated Dollars, both with Motto and without, increased by 4% in MS62 as did PCGS Trade Dollars in the same grade. Sight-unseen Bids for NGC PR65 Barber Dimes and PR66 Barber Quarters sagged a bit, however, along with the 8% decline in Bid for Barber Quarters graded MS67 by PCGS. A number of various denominated Liberty Seated and Barber Type material in high-grade Cameo Proof quality will be offered to the highest Bidders this week in Philadelphia.

Type II Standing Liberty Quarters are hot, especially the 1919-D and 1923-S with and without Full Head designation in MS63 thru MS66, and have posted appreciable gains. Type I SLQs are also on fire as the 1917-S in MS64FH increased by 50% and 76% for PCGS and NGC, respectively. Included in the 135 increases are a number of common dates in grades thru MS65. Perhaps a predominance of minus signs denoting lower Bids for much generic Gold Type material is to be expected as Gold Spot is once again well below the $1,800 per ounce level to $1,779, a low not seen since late August. However, the highly popular $2½, $5, and $10 Liberty and Indian issues in MS63 and better grades held on well to their current Bids during this extremely active week. Certified Coin Exchange reported 192 sight-unseen trades this week amounting to over $2 million, over half of which sold at the dealer Asking price. Of this total, $1.5 million was transacted for NGC material.

Many later-date Mercury Dimes acquired stronger sight-unseen Bids with numerous issues in MS67 on the rise, particularly the 1943-D, which is up again for the second straight week. A $10 rise in Bid for the 1945-S translates into a nice 16% gain, while a slew of NGC FB designated peers joined in on the ascent to higher ground as well. The Walker issues that have traded most actively these past several weeks are now seeing mixed results. While many late-date NGC examples in MS65 are retrieving a good portion of their Bids from two weeks past, Bids for their PCGS peers in MS66 are moderately descending. Issues such as the 1946-S and 1947 in MS67 remain on fire however, as sight-unseen Bids for all early Walkers are still retaining strong support across the entire grade spectrum.

Stack's Bowers, the official auction house of the Whitman show, will feature, among many others, the following highlights: 1868 Liberty Seated Dollar, graded PCGS PR65 Cam; 1934-S Peace Dollar, NGC/CAC graded Gem; and a 1922 $1 Grant with Star, CAC approved, PCGS MS67. The auction will also include some very low mintage and low pop Gold Type specimens, such as a not-often-seen 1894 $2½ Liberty, graded MS65 by NGC, with a mintage of only 4,000 pieces, and a combined pop of only 24 with 22 finer. Others include a 1914 $10 Indian in PCGS MS66; and a Proof 1891 $20 Liberty, one of only 52 minted, graded NGC PR58 Cam, with CAC approval.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.
